

MASTER KEY GENERATION SOFTWARE

- Creating master key systems on paper is time consuming and prone to costly mistakes, Masterking will create complex systems consisting of thousands of bittings in mere seconds
- Database of 220 lock types from more than 50 lock manufacturers
- Handles locks containing 4, 5, 6, 7 or 8 chambers
- Uses manufacturer specifications but allows editing of settings
- Systems can be downloaded to Codemax or Tiger Shark for automatic key cutting of systems
- Displays change keys, block masters, row masters, vertical & horizontal group masters, page masters, multi-page masters, and TMK in page format
- Supports cross keying, total position progression, rotating constants, and sectional master keying
- Computes driver and control pins in I/C core systems
- Allows exporting of system to Excel and other formats
- Descriptions can be entered by each bitting
- Allows manual entry of existing systems
- Includes "How to Create Master Key Systems" CD which explains the fundamentals of creating systems

KEY TRACKING SOFTWARE

- Provides complete management of keys, key holders & door locations
- See who has access to a location
- See which keys have been issued and which keys remain on hook
- Work orders can be given to track cylinder installation and cut keys
- Interfaces with Masterking, Codemax & Tiger Shark to make an all encompassing key production and tracking suite
- Can be used on a single PC or located on a network server. Access levels can be set to restrict key bitting and other information for clerical users
- Concurrent views of up to 8 different windows to see lists of personnel, keys, key sets (rings), locks, locations, key cabinet, door hardware & keying information
- A large variety of detailed reports provide concise information
- Information can be imported and exported in delimited formats
