

# THE CHRIST STARS

The purpose of this illustration is to ascertain the cosmic pattern of the *Jupiter-Venus* conjunctions from 2011-2019, spanning over a 7-year period. In astronomical terms, the *Jupiter-Venus* conjunctions occur on a regular basis' almost on a yearly basis. What is unique about this almost yearly conjunction is that this *Jupiter-Venus* planetary conjunction is deemed the 'Star of Bethlehem'. This is an error, although innocent enough, Jupiter was the *Star of Bethlehem* was only planet Jupiter, singularly. This occurred on December 25, -2 BC. This is when the *Magi* arrived at the birthplace of Jesus as He was already over a year old. This would put the timeframe of 2017 years from when the triple conjunction of Jupiter with *Regulus* occurred and the birth of Jesus. It would also be 2018 year from the initial *Jupiter-Venus* conjunction in Leo. The more accurate rendering of the *Jupiter-Venus* conjunction should be considered the 'Stars of the Christ'. What has been abuzz is that this same *Jupiter-Venus* conjunction occurred on July 1, 2015. Many considered this event the 'return of the Bethlehem Star'. Other however believe that as it could be signaling the coming of Jesus Christ, it conversely could be instead heralding the 'birthing' of not the 'Christ' but the AntiChrist. This is stipulated on the understanding of many that the AntiChrist of Lucifer has to come first before the return of the true King and Messiah of Israel, Jesus Christ. What is unique about this *Jupiter-Venus* conjunction pattern is that given the timeline, there appears to be a 7-year span of time that is sectioned off as there are none prior or after this almost 8 year sequence of time. During this time span, there are a total of 8 *Jupiter-Venus* conjunctions.

## JUPITER-VENUS CONJUNCTION PATTERN 2011-2020

July 1 is the 182nd day of the year (183rd in leap years) in the Gregorian calendar.  
There are 183 days remaining until the end of the year.

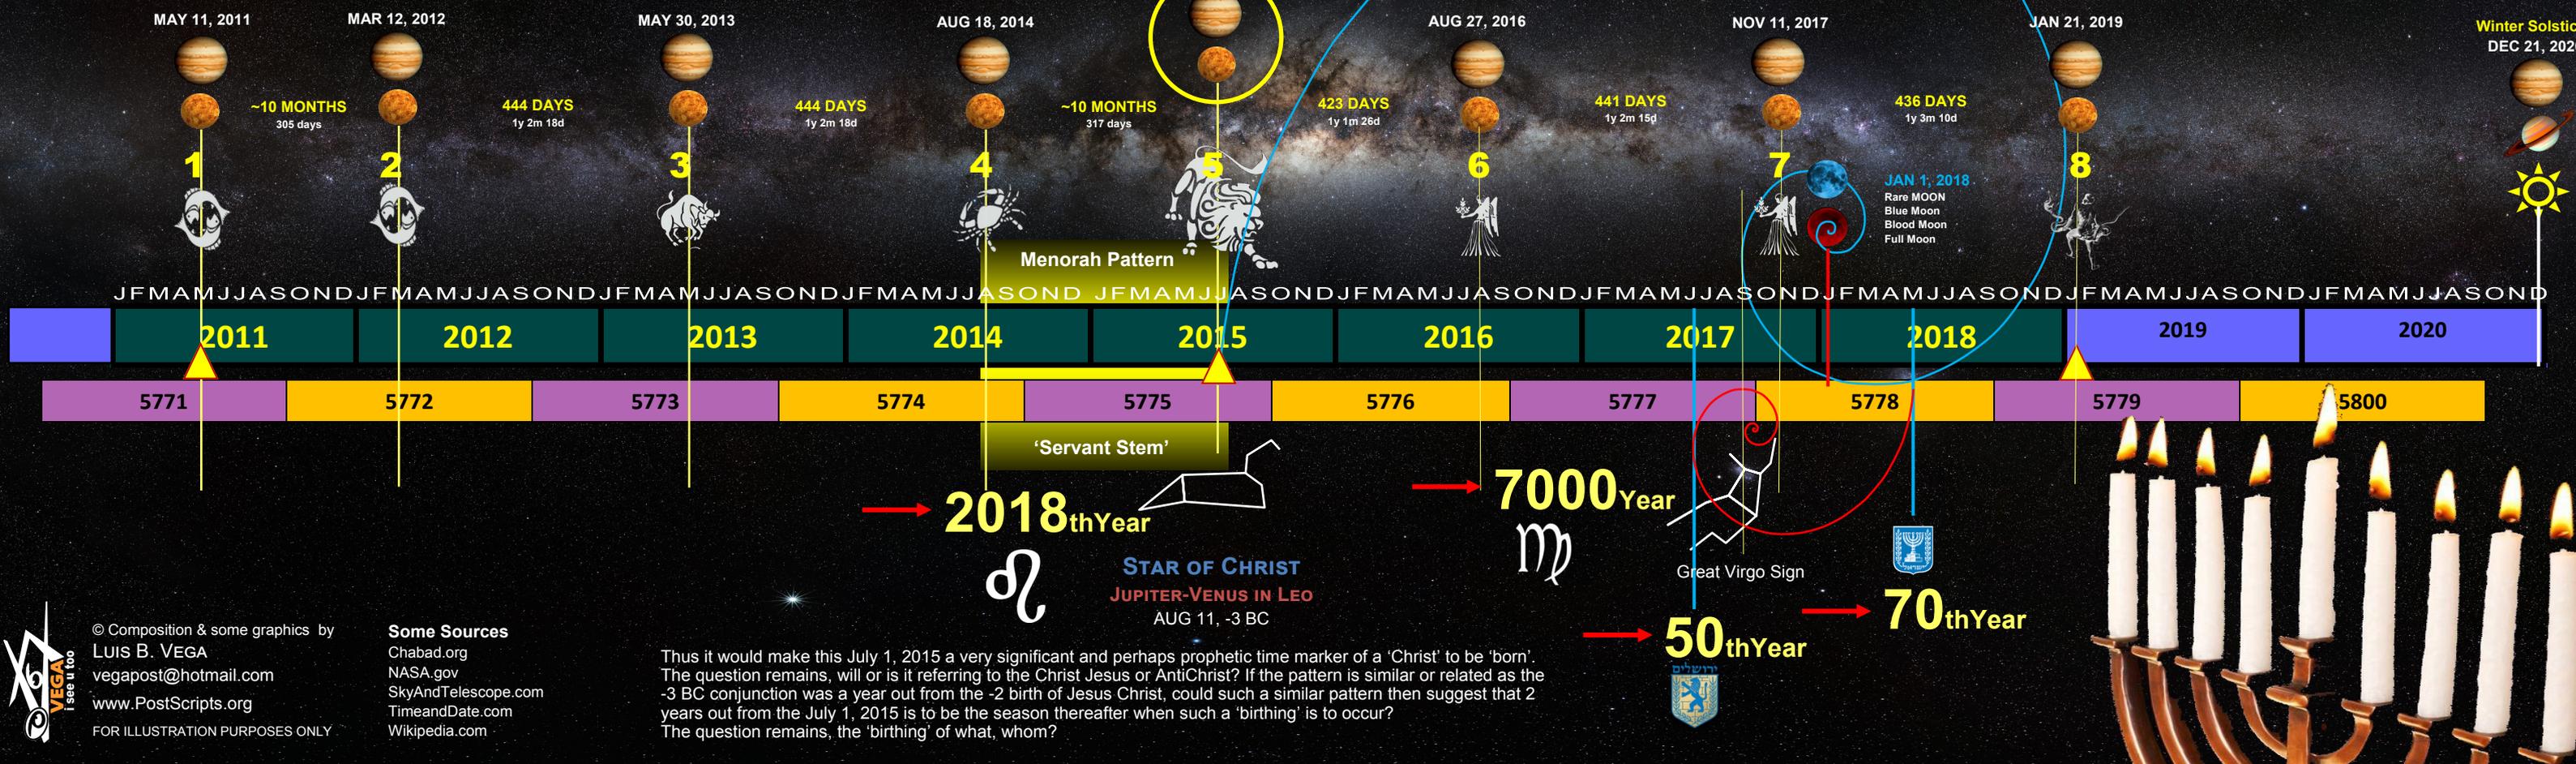

### 'The Star of Bethlehem'

JUL 1, 2015

Probably the most profound observation of this cosmic *Jupiter-Venus* conjunction is that the 8 conjunction points appear to suggest a 'Hanukkah Menorah' motif. Amazingly, if one plots-out the 8 *Jupiter-Venus* conjunctions on the timeline, the middle section of time culminates in the July 1, 2015 'Star of Bethlehem'. This is in reference to the typology of the center stem called the 'Servant Stem'. This conjunction occurred in the sign of Leo as it was just prior to the birth of Jesus in -3 BC. Why Leo is theologically significant is that it is ascribed to be the 'Sign' of the Messiah, the King and Jerusalem, etc.

One other amazing attribute about this July 1, 2015 'Servant Stem' conjunction of *Jupiter-Venus* as that it also had a double witness of sorts in that July 1 is exactly the middle or point of a year. What is unique about this metaphorical association is that based on the theological interpretation of the book of Revelation and the *Gospels*, Jesus is that Menorah sustaining the 7 Churches of Asia and is the *Light of the World* of which He testified about Himself.

Thus it would make this July 1, 2015 a very significant and perhaps prophetic time marker of a 'Christ' to be 'born'. The question remains, will or is it referring to the Christ Jesus or AntiChrist? If the pattern is similar or related as the -3 BC conjunction was a year out from the -2 birth of Jesus Christ, could such a similar pattern then suggest that 2 years out from the July 1, 2015 is to be the season thereafter when such a 'birthing' is to occur? The question remains, the 'birthing' of what, whom?
