

SUMMER IS HERE AND IT'S **NOT** TIME FOR ANOTHER CORONA!

2020 has started off with a BANG but maybe not quite the bang we were looking for!?!? Dealing with the Corona virus hasn't been easy but hopefully we can soon settle down and go back to some sort of normal again! How about a nice cool lemonade?

As an "Essential Business", Williams Renovation stayed busy this Spring... providing homeowners with repairs when they needed them. Re-building from a 'leak'... or building a new patio cover or pergola... or putting on a fresh coat of paint... regardless of our surroundings, we practiced our social distancing and wore our masks when necessary. We will carry on and continue helping our customers with their special needs and projects when they need us. Be sure and call us with any of your special projects.

Are you ready for summer? June 20 is the official day. Even though it will be HOT as is usual here in Texas, I know you folks are ready to get out and have some fun this Summer! Backyard BBQ's...jumpin' in the pool... hittin' the road for a little trip...

Rangers games? **Cowboys**? (Not sure when that will happen!?)

If you're going out on the road for awhile, be careful and have fun. We can handle your "to do list" while you're gone. Then you come back home to a new house or a new space re-painted, redecorated re-built, or remodeled. We do it all the time!

Customers in northeast Texas have been entrusting me with their homes for **over 35 years**. With you there or with you gone...

Don't worry! We have a track record for helping our customers while they're away at work or off playing around!

*We can check your sprinkler heads and system for **LEAKS** and make the necessary repairs. **Water is too valuable to waste.**

*Remember summer is the time to keep your **FOUNDATION** watered with **soaker hoses**. A sprinkler system will **NOT** keep a foundation adequately watered. If the soil is cracking, or there's a **GAP** at the foundation it's already too late. Put a timer control on your outside hose bib (faucet) for those soaker hoses.

*We can get your house re-painted inside or out. Nothing like a **fresh coat of paint** before that big party later on!

*Have a professional perform a maintenance check and cleaning of your air conditioning system. Having a maintenance plan is smart with a reliable company so you're not caught off guard if something breaks. AC condenser replacements are expensive.

**** PLEASE CALL ME AT 214-325-3046 or at**
