Trainer

Last revised: 03/01/2017

### \*\*\*About us

At Option2drive.co.uk I have been teaching people to drive since 2008 with a very good successful pass rate of around 91% I am a grade A DVSA approved driving instructor and nominated in the top 6% in the country of all instructors. I am very passionate about teaching people to drive at all levels as this is my full time job as a driver trainer and put all efforts in getting people their licenses who are willing to learn. In addition I also train (PDI's) Potential Driving Instructors and re-train those already on the Approved Driving Instructor registrar under the ORDIT scheme (Official Register of Driving Instructor Training) which you could find more information about this on the direct.gov website.

### \*\*\*Before you can legally drive

You must have had a valid provisional driving license before you can take up driving tuition and be able to read a number plate from the recommended distance of 20.5m (Contacts and glasses are also acceptable).

### \*\*\*Our vehicle(s)

### \*\*\*Hourly driving lessons

Our hourly price reflects on today’s competitive market however we are not the cheapest out there; or not the most expensive.... as with us here at [Option2drive.co.uk](http://www.option2drive.co.uk) you get value for money and you can see what you are paying for as with many other driving school’s out there; they do not keep a track record of your driving ability progress as shown below in the illustration, so you are told to just drive with no aims or objectives set for that current lesson so you walk away asking yourself; what had you learned on that lesson. With us we aim to not let you feel disappointed after each and every lesson so we structure each lesson week by week so there is aims and objectives set for you to achieve your goals at your own pace whilst we make learning enjoyable and fun to give you something to look forward to each and every week!

## HOW WE WILL PREPARE YOU:

Our aim is to fully prepare you ready for your practical test so it is not so much of a shock when you finally there sitting next to an examiner. Our progress data summarizes improvements you have made on the driving and what areas may require more practice in future lessons from a structured syllabus which only you have access to upon request.

Our driving lessons are also very structured as below gives you a brief idea of how lessons should be conducted so that effective learning takes place in a vehicle in a constructive and professional approach.

### **Lesson Planning**

- Recap at the start of lesson based on previous lesson
- Discussion on current lesson and aims and objectives
- Route planning on specific area's that the pupil is able to deal with and achieve their goals and able to move forward with their own progress once developed the necessary skills and basics to be able to deal with other parts of the test routes that are more busier and have more hazards such as crossings, roundabouts and country lanes etc.
- End of lesson feedback
- Update progress online report

### **Learning and Teaching Strategies**

- Driving to relevant location of that specified topic taking into account of pupil level under risk management
- Guided and prompted (Q&A) practice on current topic, e.g. crossroads, roundabouts or pedestrian crossings etc. once
- Drive home on a route incorporating current topics that allows independent driving if applicable
- Constructive feedback and main points discussed for action plan of following lesson based on initial lesson

## \*\*\*Data progress App

Here is a little peak on how we keep your progress data on all your lessons and how we can email you your last lessons performance on request.

This data holds vital information about you, your lesson hours used and any remaining hours if you have pre-booked and other information such as tests currently booked and plenty of other information which helps us help you on getting things done as efficiently as possible including data tracker which holds vital information on how you are progressing on each and every one of your lessons.

The Pupil progress data shown below was designed by Option2drive.co.uk to assess every individual's learning patterns to help them achieve a structured lesson where effective learning takes place and for their own piece of mind on what areas may need to be worked on and the areas which are at a good standard which require less work or if any.

Driving lessons can take much longer and cost you more money in the long run opposed to doing an intensive course in a short time frame saving you not only money, but also time which more and more people ever than before are doing now days due to many people wanting to learn to drive very quickly and efficiently who have full time work commitments but just can't get the time to learn.

Occasionally we have special offers on OUR website so please keep a look out!!!

By law as you are driving a motor vehicle we would need to take a record of your provisional driving license number and as from June the 8<sup>th</sup> 2015 you no longer need to bring the counterpart if you have one however before starting with us we would normally ask to see a record of your license history which you are able to register by clicking on this link: <https://www.gov.uk/view-driving-licence>*

*Once you have clicked on the link above or copied and pasted you can then follow the steps to creating your license "check code" then give this code to your driving instructor to view your license if requested to do so as this replaces the counterpart.*

*and we may also ask you to fill out a short questionnaire regarding any past driving experiences and if you have any medical issues that we should know about as this would only take around 3 to 5 minutes of your time for the best of our interest and everyone else's as you can appreciate that health and safety is our number one priority.*
