

Excellent emergence

Drought tolerant

Great grain quality

LG61C28 offers great performance in Central and Western environments. Featuring excellent emergence for no-till as well as great stress tolerance, it has very good test weight and average disease tolerance. Manage Goss's Wilt and stalk lodging in late season.

Growing Degree Days (GDD)

Pollen: 1334 Silk: 1325 Black Layer: 2803

Plant Rate Flexibility

26 - 36,000 Plants per Acre
