

MONDAY
May 11th
Doors Open
18:30
for visiting &
Meeting begins
19:00

Salvation Army
Fellowship Hall
in the rear of
10725 Alta
Street,
Grass Valley

May Meeting Announcement

Fox Hunting/Direction Finding

Presenter: Greydon Hicks (KC6SLE), SFARC's Fox Hunting leader

What You'll Learn:

- Fox hunting is the competitive practice of locating a hidden radio transmitter as a game using Radio Direction Finding (RDF) techniques. It is known by several other names, including: Hidden Transmitter Hunt, Bunny Chasing, or T-Hunting.
- Participants take directional bearings from multiple locations and triangulate the transmitter's position on a map.
- Foxhunting builds practical radio skills and prepares operators to locate: Interference sources, Aircraft Emergency locator beacons (ELTs), Lost or malfunctioning equipment, i.e. stuck transmitters. It's also a great excuse to build new gear, enjoy friendly competition, and solve a fresh mystery every time. And most importantly, it's fun.
- Discover techniques of direction finding using just an HT and its rubber ducky antenna, or using a home-made tape measure Yagi directional antenna, an attenuator, or an offset attenuator, and more.
