

STAR OF DAVID COSMIC COUNTDOWN

ALIGNMENTS, SYMMETRY AND PATTERNS FROM 1990-2013

The purpose of this illustration is to highlight a key celestial occurrence in the Heavens called the Star of David planetary alignments. The focus of the conjunctions presented will be from the recent occurrences in our modern time starting from 1990 to 2013. Since 1990, there are 13 Star of David configurations that occurred. The 13th occurrence is the 'last one' leading up to the Tetrad of 2014-2015. *Apparently the 13th one is a 'twin' star with its double occurring on Aug 25/26 like the one in 1996. After 2013, there will not be another such configuration of either a Star of David leading up to a Tetrad alignment for another 100 years or so. The pattern of all total lunar eclipses since 1989 to 2013 will be plotted onto the Star of David timeline. It appears that various total lunar eclipses provide some spectacular symmetry as well corresponding to the Star of David configurations and frequency leading up to the Tetrad of 2014-15. The Star of David alignments appear to have definite numerical patterns -with corresponding symmetry to other Star of David alignments and with total lunar eclipses. The Star of David cluster, starting in Aug 1990 to Sep 2001 has an identical and symmetrical proportion of time. The midpoint has an incredible 'twin' or 2 consecutive Star of David configurations, the 4th and 5th ones in Sep and Oct of 1996. These 2 or twin Star of David alignments seem to serve as sort of a fulcrum within the timeline.

From observation, the 13 Star of David planetary alignments appear to be a clear countdown to the Tetrad of 2014-15. In Biblical prophetic perspectives, the time or season in which the Tetrad occurs will witness, within about 2 years, the 70th year anniversary of the birth of Israel and the 50th year anniversary of the recapture of the Temple Mount of Jerusalem by the Jewish nation. It also appears that there is a spectacular sequence in the increase in frequency related to the countdown after the twin Star of David fulcrum time-markers of 1996, which is 17 years to its counterpart 'twin' of 2013. There are 3 pair of Star of David: the 7th and 8th, 9th and 10th, 11th and 12th that intensify the 'countdown' with increasing frequency that lead up to the single Star of David alignment of 2013. The Star of David alignments get closer to each other starting with the 9th and 10th configurations. It is like a celestial drum-roll; perhaps corresponding to the 'labor pains' that Jesus Christ warned about would characterize the Last Days on Earth before His Return. Perhaps these alignments in the Heavens

A BIRTHING

Perhaps these Star of David 'Signs' in the Heavens could it be a countdown to a birthing; perhaps to the Rapture, the New World Order, the rise of the AntiChrist, a Prince, World War 3 or a combination of all the above and more. Perhaps the profound association with the Tetrad's Jewish Feasts of 2014-2015 means that Israel will be the focal point in the LORD's time-table after the Rapture. Perhaps the Star of David patterns are signaling a 'birth' to occur of something as prophetic as the countdown to the end of the Church Age and the 2nd Coming of Jesus Christ.

THE COSMIC GEOMETRIC KEY

Many believe that the geometry of the Star of David at certain celestial dimensional levels can be used as a cosmic trans-dimensional 'Key' to open 'gates' or celestial portals, doors to the Spirit Realm. Perhaps such a 13th Star of David 'key' could be like the 'Door' that opens for the Bride, the Church to be raptured out of this present dimension. It is a type and pattern only using this Star of David as it has an alignment to the GATE OF GOD and GATE OF MAN axis. This axis runs through the

COSMIC STAR OF DAVID SYMBOL

There are 6 cardinal points or stars in the Cosmos or Mazzaroth that approximates an actual Star of David symbol in the Heavens. These stars are in Aquila and in Cetus, Arcturus, Regulus, Sirius, and Eridanus. When the Star of David planetary alignments do occur, they translate into what we can observe from our vantage point as a 'T' or 'cross' formation within our Solar System.

CELESTIAL MERKAVAHS

In Jan of 2010 a celestial anomaly was discovered by the Hubble Telescope. Scientists could not decipher if it was either an asteroid or a comet or remnants of either. They nonetheless labeled this object P/2010 A2. What is very peculiar about this object is its geometric shape. The object has a very long streak or tail like a comet but it neither has a coma or nucleus that comets have. It has no apparent asteroid composition or center defined mass. Instead this object has a pronounced Star of David geometric design. Could be some sort of a 'celestial chariot' - a Star Tetrahedron streaking across the Heavens? Or could it be just cosmic debris subjected to the frequencies of its speed based on its size and matter composition to reflect this design due to its vibration and resonance?

AURIGA' 6 STARS

The Celestial Shepherd A Star of David within a Star of David. The Shepherd of Israel i.e. King David - a type of the Messiah Jesus Christ The Great Shepherd of the Sheep who is pierced by Taurus's horn at the heel to shed His Blood for redemption of Man.

Regulus 23.5°

A Star Tetrahedron incorporates a 'square within a square' as well. This would allow for the very Holy of Holies which is a perfect square to serve as the Throne of YHWH. The Throne Room of the LORD is always a perfect cube, as with the Tabernacle of Moses, the Temples and the New Jerusalem.

NEW JERUSALEM - A STAR TETRAHEDRON?

In the Book of Revelation 21, the 'City of God', the New Jerusalem, the very Throne Room of the LORD literally will super-transpose itself onto the Earth. Based on the given measurements that are described in Ezekiel, many speculate that the New Jerusalem will be a 'cube' or a 'pyramid' in shape. What if it is actually both one in the same. Basically it would be 2 intertwined 3-dimensional pyramids within a square.
