## SERVICE

Data Security & Privacy assessment is a service provided by Zaviant that is designed to assess the current state of your Data Security & Privacy program. The assessment covers key privacy regulations such as **GDPR**, **CCPA** and cybersecurity frameworks such as **ISO 27001/2** and **NIST 800-53**. It is a key engagement to help you understand your existing controls and define your cybersecurity roadmap.

APPROACH

The Data Security & Privacy assessment is a *first step* in building your cybersecurity program. Our methodology is simple and effective:

ASSESS (current state & roadmap)	DESIGN & IMPLEMENT (defined implementation plan)	CONFORM (ongoing monitoring and reporting)

Key assessment milestones are:

- Data Privacy Readiness Assessment Against GAPP (Generally Accepted Privacy Principles)
- Data Security Readiness Assessment

DELIVERABLE(s)

The report(s) focus on helping you understand your current state, message to your executives around planning and executing an effective cybersecurity program.

- Data Privacy Readiness Assessment Report
- Data Security Readiness Assessment Report

FEES & TIMELINE

This assessment is designed so that it is quick yet an impactful engagement that is scoped at approx. one week of work effort per organization/entity.

TALK TO US

ABOUT US: At Zaviant, we spend time learning the intricacies of our client's businesses to provide the most comprehensive solution possible. We understand that navigating compliance frameworks can be difficult even for the most mature businesses. We take the time to explain our approach, understand the relevant risks facing your business, and implement an appropriate solution. Collectively, we have decades of experience in IT compliance and security.
