

DESCRIPTION

RUST AWAY is specifically formulated to reverse the process that causes rusting and oxidation. This clear liquid destroys the corrosive agents that support oxidation and leaves a clean, rust-free metal surface.

RUST AWAY prevents further rusting by leaving inert elements that become an integral part of the metal surface without altering the metal's composition. This process is called phosphatizing and can be used on all ferrous and non-ferrous metals.

RUST AWAY will completely eliminate paint failures caused by improper cleaning of metal surfaces.

RUST AWAY removes rust stains that were caused by ores in the E.I.F.S. mixture from E.I.F.S. surfaces.
Removes rust stains caused by fertilizer.

ADVANTAGES

- Non-Flammable
- Fast and effective
- Prevents paints from peeling
- Will not burn skin
- Estimated Coverage Rate Per Gallon approx. 150-300 sf

FOR USE BY

- Maintenance companies
- E.I.F.S. Applicators
- Concrete & Masonry Contractors
- Building Contractors
- Specialty Contractors
- Restoration Contractors

FOR USE ON

- Metals
- Concrete
- Brick
- Equipment
- E.I.F.S.
