# Commonly Used Sheltering Items & Services Listing (CUSI-SL)

## *Key Information*

(March 2013)

### ➤ Process

- Items being requested from the CUSI-SL must follow standard operating procedures for ordering (e.g. – Action Request Form (ARF) from State)
- Requested items will be annotated in the Single Point Order Tracking (SPOT) process
- Items highlighted in Orange (# HK-001 thru HK-0017 on page 2 and Items # FD-001, FD-002, and GN-001 on page 4) will automatically go to the Logistics Management Directorate at FEMA National headquarters for fulfillment due to existing agreements with other federal agencies for support
- Items highlighted in Green (# I/T 001-I/T 007) on page 5 make up the *perishable* items and items #I/T 008-I/T026 on page 5-6 make up the *non-perishable* items in an Infant/Toddler kit which can be pre-staged
- DME and CMS are intended to be ordered and employed as matching kits to support sheltering operations
- Regional Log Chiefs will be able to utilize existing BPAs/IDIQs for Mass Care support to include Shelter and Feeding Items and related Services, Infant and Toddler Items, Durable Medical Equipment and Consumable Medical Supplies

### ➤ Notes

- A separate Staging Area for Mass Care support may be implemented at the time of the disaster depending on circumstances
- FEMA has a goal of replenishing all Standard Disaster Survivor (SDS) cots with Enhanced Disaster Survivor (EDS) cots through attrition over time

## Commonly Used Shelter Items & Services Listing (CUSI-SL)

**General Note 1:** Planning estimate is based on 100 person shelter population for one week per order or as requested
