

8-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER) / Hazardous Materials Technician Annual Refresher Training

Course Director/Instructors

John M. Fernandez, CIH, CSP, CMC - Industrial Hygiene Professionals, Inc. (Course Director/Instructor)

Jim J. Brandt, CSP, CHST, CET - Industrial Hygiene Professionals, Inc. (Instructor)

Benefits

A combination of lectures, video presentations, group exercises, and selected case studies provides students with the 8 hours of refresher training annually required by OSHA for all employees involved in hazardous waste operations. Course participants will gain knowledge in: new regulations and recent changes in existing regulations; a review of major topics from the 40-hour initial training; and recent incidents that have had an impact on the hazardous waste industry and current activities in Guam.

Who Should Attend

Individuals who have successfully completed a 24-hour or 40-hour initial training course and are due for the annual refresher.

Selected Course Topics

- ❖ New GHS Requirements for Hazard Communication
- ❖ Hazardous Materials Terms and Definitions
- ❖ Regulatory Review (OSHA/EPA/DOT)
- ❖ Review of DOT Hazard Classes and 2012 ERG
- ❖ Hazard Recognition, Evaluation, and Control
- ❖ Toxicology and Exposure Guidelines
- ❖ Spill Containment and Confinement
- ❖ Air Monitoring Instrumentation
- ❖ Medical Surveillance Programs
- ❖ Respiratory Protection / Chemical Protective Clothing
- ❖ Decontamination
