

Special Maintenance Procedures

- **Soil Retardant Treatment / Protectant**

Applied to carpet after restorative cleaning methods have been used, to help carpet resist soils and staining, this in turns prolongs the life of your carpet.

- ***Applying Protectant***

1. Apply full strength, do not dilute, using a pump up sprayer.
2. May be applied on wet or dry carpet
3. For best results apply the product in a # style, applying left to right horizontal and then applying in the opposite direction on second pass.
4. Allow carpet to dry completely before opening for traffic.

- **Deodorizing**

Mixed with carpet cleaners to produce a pleasant fragrance or used to treat and eliminate odor causing problems, such as animal odors. Follow manufacturer directions for best results.

Recommended Products:

- Active Enzyme Cleaner
- Nilodor Water-soluble Deodorizer
