## "Einstein's God Model"

special screening at  
**BETHEL CINEMA**

**Wednesday May 24th at 7:00 pm!**

**PRESS PHOTOS - FULL RES**

**BETHEL, CT (May, 2017):** We are pleased to announce the **Connecticut Film Festival's** weekly [Film Fest 52](#) is hosting a special screening of the award winning sci-fi thriller "**Einstein's God Model**" at the **Bethel Cinema** on **Wednesday May 24th at 7:00 pm!** Following the screening, there will be a Q&A with the director **Philip T. Johnson**. The film recently won the "**Best Sci-Fi Award**" at the **2017 New Haven International Film Festival**.

Winner **Best Picture** 2016 Comicon & **Best Science** Boston Science Fiction Film Festival, this independent feature film uses the science of Quantum Physics and String Theory to take us on a clandestine adventure beyond the known universe. Director Philip T. Johnson uses love as the ultimate connection, compelling his main character, Brayden, to fearlessly trust a shadowy physicist and a blind psychic drunk who launch him into other dimensions in search of his fiancée.

Mr. Johnson, the Director of [Einstein's God Model](#) and Connecticut native, states "*EGM is a mashup of classic technicolor science fiction and modern theoretical physics. We really wanted everything to have this cool pulp sci-fi flavor - the story, the characters, the visual effects, and even the music were designed as a nod to that cinematic period.*"

Geeks & nerds are discovering a new breed of independent sci-fi filmmakers who, without studio support, are creating original stories that kick fiction's butt with a blast of science!

Producer Kenneth Hughes is a voice for independent filmmaking on the festival scene, and has brought in a deep bench of Hollywood talent to create a powerful post-production team. The film's amazing score was composed by Senon Williams of the immensely popular band "Dengue Fever" - a darling of public radio. Erik Tillmans of Dreamworks supervised the film's groundbreaking visual effects. Naaman Haynes supervised the creation of the film's other worldly soundscape and mixed the film's sound at the legendary Technicolor sound studios on the Paramount lot in Hollywood. Producer Craig Dow of Imageworks Chicago, has over 20 years of production experience, working with such artists as Gary Sinise, Jane Seymour, Kristin Chenoweth, and recently wrapped production on "Confessions of a Teenage Jesus Jerk" directed by Eric Stoltz.

Much of the cast comes from the Chicago acting community (e.g. Second City Theater), including Brad Norman (Craig Leeham) and Darryl Warren (Dr. Carl Meiselhoff). The film also enjoyed The Discovery Channel's, Mike Turano as the Director of Photography

**Other facts:** The production had physics professor Daniel Record (a veteran of the Apollo Moon program and Presidential Awardee) consulting. Dr. William Rosenblatt of Yale University, contributed as the medical consultant. Using the visual effects as a character, the filmmakers went to great lengths to blur the line between science and fiction, perhaps even ... erase it?

"... an engaging mind bender" - **Los Angeles Times**    Rotten Tomatoes **FRESH!** 🍅

"... this imaginative indie is bursting with ambition." - **The Hollywood Reporter**

"Einstein's God Model opens a door a never shuts it ..." - **Cinema On the Rocks**

"Einstein's God Model burns with science ... a strangely glowing soul." - **Screen Anarchy**
