

# Frequently asked questions; Paper Cutter

What is the purpose of the fold down backgauge?

-The fold down backgauge allows the cutter to fit through most standard size doors.

What is the size of the SC-18 paper cutter?

-Maximum cut size is 18.9”

What is the size of the SC-26TS paper cutter?

-Maximum cut size is 26.4”

Is the SC-18 machine electric or hydraulic?

-The SC-18 is electric. If you are looking for a hydraulic cutter, see our SC-22TS or SC-26TS.

Are your paper cutters programmable?

-Yes, all of your paper cutters are completely programmable.

What safety features are included?

-All of our paper cutters come standard with light safety beams to ensure the safety of the descent in case of an emergency.

Do your paper cutters have a blade depth adjustment?

-Yes, it does and unlike other paper cutters, this adjustment is accessible from the outside of the machine. No need to remove any covers to make the adjustment.

What is the minimum cutting size?

-Minimum cutting size of all our cutters is 1.18 inches.

Is a line light offered with your paper cutter?

-Yes, all our paper cutters come standard with a red LED cut line light for precise cutting.

What kind of job memory do the cutters have?

-The SC-18 & SC-22TS have a memory of 80 programs. The SC-26TS has a memory of 88 programs.

Do these paper cutters require 3 phase power?

-No, all of our cutters are single phase. The SC-18 is 110V and the other models are all 220V.
