

# 30-Hour OSHA Construction Safety & Health Training Course

## Course Director/Instructors

*Jim J. Brandt, CSP, CHST, CET - Industrial Hygiene Professionals, Inc.*

## Benefits

*Lectures, video presentations, classroom exercises and in-depth discussions provide students with a comprehensive overview the OSHA construction regulations (29 CFR Part 1926). Students are introduced to OSHA policies and procedures as well as general construction safety and health principles necessary for a safe work environment. Differences in OSHA regulations and the Army Corp of Engineers Safety and Health Manual (EM 385-1-1) are also discussed to assist those working on military projects with achieving full safety and health compliance.*

## Who Should Attend

*This course is a must for supervisors, safety personnel and worksite managers for Federal construction projects but is appropriate for anyone seeking to improve their knowledge of safety and health and improving worksite safety on construction projects.*
