Gilad&Gilad LLC, Reseda, CA, has launched Neurofencine, a dietary supplement designed to support pain-free nerve function. The product contains G-agmatine, a natural amino acid metabolite that is present in small amounts in plant, fish and meat foodstuffs. G-agmatine targets and activates several molecular mechanisms critical for healthy nervous system functions, including neurotransmitters, ion channels, nitric oxide (NO) production, polyamines and extracellular proteins.
