MONTANA RANCH

BRED FOR BALANCE BULL & FEMALE SALE
NOVEMBER 11, 2023 • 1 MST
AT MONTANA RANCH, BIGFORK, MT

MONTANA RANCH

SCHEDULE ^{OF} *Events*

FRIDAY, NOVEMBER 10, 2023

All Day: Cattle available for inspection

5:00 pm: Happy Hour Social – join us at the ranch for refreshments and fellowship.

SATURDAY, NOVEMBER 11, 2023

7:00 am: Cattle available for inspection / coffee and donuts

Noon: Complimentary Lunch

1:00 pm: The Montana Bred for Balance Sale

1463 Hwy 83 • Bigfork, MT 59911

David & Sandra Sabey • Matt Cottle

David & Seana Brown • (406) 210-5605

Bulls@MontanaRanchAngus.com

BULLS

RANCH RAISED AND DEVELOPED

- Montana Ranch bulls are designed to provide you with the best value in the business. Genetically designed to predictably capture optimum levels of growth and performance, the Montana Ranch bull is backed by a no-excuses program and the most useful, maternally-oriented cows in the business.

AGE ADVANTAGED HERD SIRE PROSPECTS

- Get more cows bred with strong-aged herd bulls. These strong-aged bulls can cover more ground, breed more cows and hold up better.

FIRST BREEDING SEASON GUARANTEE

- No risk warranty on your bulls. We'll provide a full credit minus salvage towards a replacement if your bull gets injured during the first breeding season before 9/1/2024. Give us a call at 406.210.5605 at the time of the injury for any claims. The warranty does not cover death of the bull. Mortality insurance will be available for purchase at the sale.

DEVELOPED SENSIBLY FOR LONGEVITY

- Get more use for a longer time. Montana Ranch bulls are grown slowly on high roughage rations and get ample exercise on pasture. They are hard, athletic and ready for work.

GENOMIC TESTED AND PARENTAGE VERIFIED

- DNA tested for peace of mind. Each bull is free of all known genetic defects and has been parentage verified via DNA. The EPDs of each bull have been enhanced with the AngusGS DNA test.

FREE DELIVERY IN MONTANA AND ADJOINING STATES OR \$100 PICK UP DISCOUNT

- We deliver free of charge in Montana and to central points in adjacent states. If you elect to haul your bull within a week of the sale, we'll deduct \$100 per bull.

FREE DELIVERY IN THE CONTINENTAL U.S. ON 3 OR MORE BULLS/FEMALES

- If you purchase three or more bulls and/or females, we will deliver them free of charge to a nearby central point (vet clinics, stockyards) anywhere in the Continental U.S. For less than 3 head, we will coordinate trucking at the lowest possible cost.

SEMEN TESTED AND READY FOR IMMEDIATE SERVICE

- Put these fertile and athletic bulls to work right away. All of the bulls passed a semen test administered by Hoffman AI Service within 30 days of the sale.

EVALUATED AND SCREENED FOR DISPOSITION AND STRUCTURAL SOUNDNESS

- Easy to handle and sound from the ground up. We eliminate the problems so you won't have problems.

SIGHT UNSEEN PURCHASE SATISFACTION GUARANTEED

- Let us be your eyes and we'll guarantee your satisfaction. Give us a call or email with your specifications and we will provide you with a list of bulls to meet your needs. Can't be with us at the sale site, on the phone or on the internet on sale day? Let us know before sale day and we will have a buyer's representative contact you.

WINTER BOARDING AVAILABLE

- Free wintering is available on bulls costing \$5,000 or more and on purchases of 5 or more bulls. Other bulls may be wintered at a cost of \$500/bull to be billed with the purchase of the bull.

For more information and to view individual videos, go to MontanaRanchAngus.com

FEMALES

40 BRED ANGUS X HEREFORD F1 HEIFERS

- Maternally-oriented heifers bred to Montana Ranch Angus sires.
- Freight allowance – First 100 miles FREE.

8 REGISTERED ANGUS HEIFERS

- Direct from the replacement herd.

GENOMIC TESTED AND PARENT VERIFIED

- DNA tested for peace of mind.

FREE NATIONWIDE DELIVERY WITH THE PURCHASE OF THREE OR MORE LOTS

- Purchase any three bulls/females and we'll deliver them free of charge.

SALE DAY *Details*

SALE LOCATION

Montana Ranch • 1463 MT Hwy 83 (Swan Hwy) • Bigfork, MT 59911

SALE DAY PHONES

David Brown, Montana Ranch (406) 210-5605

David Mullins, Sale Manager (317) 503-2798

AUCTIONEER

Roger Jacobs (406) 698-7686

SALE STAFF

Kurt Kangas, Angus Journal (406) 366-4190

John Goggins, Western Ag Reporter (406) 698-4159

Devin Murnin, Western Livestock Journal (406) 696-1502

LOCAL AIRPORTS

Glacier Park Int'l Airport • Kalispell, MT • 30 minutes from Montana Ranch

Missoula Int'l Airport • Missoula, MT • 2 hours from Montana Ranch

LODGING: Please go to www.MontanaRanchAngus.com for recommended local lodging in the Bigfork/Kalispell area.

HERD HEALTH: All cattle are eligible for shipment in the U.S., although some states may require additional testing prior to delivery. All cattle are current on recommended vaccinations/parasite control.

CANADIAN DELIVERY: Canadian deliveries will be coordinated for one shipment to take place in early-mid December once health testing has been completed and entry permits secured.

ANNOUNCEMENTS/UPDATES: Announcements from the sale block take precedence over any printed material. Updates to the sale book will be provided prior to the sale.

LIABILITY: All persons attending the sale do so at their own risk. Neither Montana Ranch nor its agents assume liability for any accidents which may occur.

Welcome CUSTOMERS & FRIENDS

It is our pleasure to extend a warm welcome to you for the 2023 Bred for Balance Sale. A highlight of our year is seeing the familiar faces and renewing the friendships we've made in the cattle business. We sincerely thank you and look forward to seeing you back at the ranch.

The cattle market is on fire right now. Finally, ranchers are being rewarded! Talk of herd expansion is only talk at this time. It has not materialized and will be slow when it does happen. Much of the country continues to grapple with drought and all of us are faced with increased inputs. That's why we think this may be the most opportune time to upgrade the herd. Those older or poorer doing bulls and cows will never be worth more at the sale barn than they are now. Make the most of that opportunity by

replacing them with something younger and genetically superior.

You'll see on the pages that follow that each mating is intentionally created to provide a bred-in balance of traits designed to improve your bottom-line. While there is only so much you can do about fuel and fertilizer costs, you can impact profitability with problem-free and maternally efficient cattle with sustainable and optimal levels of performance.

We take the responsibility to those who have placed their confidence in our breeding program with a great deal of gravity. Our commitment to providing you with genetics which are problem-free and balanced for the input/output equation is only matched by our satisfaction guarantee, which

is simply the best in the business.

As usual, the bulls have been developed slowly and consistently to encourage longevity and athleticism. At every step of the process, we have sorted and culled on disposition, structural soundness and type. These bulls are sound, athletic and ready to work.

Please plan to join us at the ranch near Bigfork on November 10-11 for food, fun, fellowship and great Angus cattle. We promise that it will be well worth your time. Until then, the cattle may be viewed at the ranch or individually via video at our website. We look forward to seeing you.

Sincerely,
David Brown

BRED FOR Balance

We blend the best science with good old-fashioned cow sense to create a balanced-trait genetic foundation designed to create more profit, not just increased revenue at the point of sale. This bred-in balance of traits serves to instill fertility, structural soundness, maternal productivity/function/efficiency and moderated-mature size in every animal while striking optimal and consistent levels of growth/performance and carcass merit.

FERTILITY: The number one driver of a ranch's profitability. Research indicates that fertility is exponentially more influential on profit than any other trait. Intense pressure is placed on the Montana Ranch herd with a strict 3 heat-cycle breeding season.

STRUCTURAL SOUNDNESS: Soundness starts from the ground up. Cattle must have the ability to travel and forage to be efficient. It's no secret, every breed is grappling with an explosion of unsound hooves. Anything less than an unsound hoof is unacceptable.

MODERATED-MATURE SIZE: As cited by Dr. Rick Rasby of Univ. of Nebraska-Lincoln, there is an approximate 10% annual feed savings and a 10% stocking advantage for every 200 lb. decrease of mature weight of cows.

MATERNAL PRODUCTIVITY/FUNCTION/EFFICIENCY: The term Maternal simply boils down to a cow being able to predictably and consistently wean 50+% of her body weight with little human interaction and intervention. Easy calving cows which get their newborn up and going, which have problem-free udders for their entire life and which are able to breed back and have a calf every 355-375 days are the standard.

GROWTH/PERFORMANCE: While most producers have selected bulls for increased growth, weaning weights in commercial cow-calf herds have remained static for the last twenty years. At the same time, mature weights have increased dramatically. Expression of these higher growth genetics is governed or limited by feed resources. Selection for higher growth than the environment can support only results in increased feed costs for the cow herd. By placing simultaneous downward pressure on mature size in combination with optimum levels of weaning and yearling growth, you can make gains in performance while maintaining or decreasing mature size.

CARCASS: Who doesn't like a great steak? Marbling is not a dirty word with us if all of the key convenience and fundamental traits are bred in to the cow herd. The pursuit of extremes in carcass traits and the \$Beef bio-economic index used by Angus breeders has, however, led to a proliferation of cattle unsuited for many cow-calf operations. With growth, carcass weight and lower fat figuring into the calculation, it's easy to see how this index can have deleterious effects on making efficient cows.

NOT ALL ANGUS BULLS ARE CREATED EQUAL. Some are the product of intentional and disciplined breeding programs, while others are the product of multipliers. There truly is a difference.

THE MONTANA PROGRAM: By utilizing the best science in combination with good, old-fashioned cow sense and intentionality in building pedigrees, we are able to produce bulls with a bred-in balance of optimum performance and maternal excellence.

WE ARE VERY COW-CENTRIC at Montana Ranch and target the relationships between different cow families which affect genetic expression. Having the right genes does not hold much value if those genes are not expressed on the ranch level. Encouraging this genetic expression with the right combinations of prepotent cows and by optimizing management subsequently sets up the resulting progeny with the ability to pass on that genetic expression.

Unlike much of the seedstock industry where the pendulum is constantly swinging with fire and ice/corrective matings, we mate "like to like" for increased consistency and predictability. Imagine seven cows from a three-generation pedigree standing in a corral. Are the cows similar in type? Are they of similar size? Are they similar in their productivity? Are they similar in structural soundness? Are they similar in their maternal abilities and function? If so, they will produce sons which will, in turn, produce progeny very much like those seven cows.

Pay particular attention to the cows "stacked" in each of the pedigrees in this book. We think you will see that the cattle are truly **DIFFERENT BY DESIGN.**

If you would like to know more about the Montana Program and our breeding philosophy, just ask us! We would be pleased to share it with you!

DIFFERENT BY *Design*

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is a prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals in the database. EPDs are expressed in units of measure for the trait.

PRODUCTION

CEC (Calving Ease Direct) is expressed as a difference in percentage of unassisted births in first-calf heifers, with a higher value indicating greater calving-ease. Breed average is +7.

BW (Birth Weight), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires. Breed average is +1.2.

WW (Weaning Weight), expressed in pounds, is a predictor of a sire's ability to transmit pre-weaning growth to his progeny compared to that of other sires. Breed average is +63.

YW (Yearling Weight), expressed in pounds, is a predictor of a sire's ability to transmit post-weaning growth to his progeny compared to that of other sires. Breed average is +111.

DMI (Dry Matter Intake), expressed in pounds per day, is a predictor of difference transmitting ability for feed intake during the postweaning phase, compared to that of other sires. Breed average is +1.11.

SC (Scrotal Circumference), expressed in centimeters, is a predictor of the difference in a sire's ability to transmit scrotal size compared to that of other sires. Breed average is +.87.

MATERNAL

HP (Heifer Pregnancy), is a selection tool to increase the probability of a sire's daughters becoming pregnant as heifers during a normal breeding season. Breed average is +12.1.

MM (Maternal Milk) is a predictor of a sire's genetic merit for milk as expressed in his daughters compared to daughters of other sires. In other words, it is the part of a calf's weaning weight attributed to milk. Breed average is +27.

MANAGEMENT

DOC (Docility) is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. Breed average is +18.

CLAW SET, is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes. Breed average is +.49.

FOOT ANGLE, is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth. Breed average is +.48.

PAP (Pulmonary arterial pressure), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas. Breed average is +1.29.

CARCASS

MB (Marbling EPD), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires. Breed average is +.66.

RE (Ribeye Area EPD), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires. Breed average is +.64.

\$VALUE SELECTION INDEXES

Selection indexes are a tool to select for several traits simultaneously, while taking into account genetic and economic values. \$Values encompass the revenue generated from genetically derived outputs and associated costs from required inputs.

\$M (Maternal Weaned Calf Value), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production. Breed average is +63.

\$W (Weaned Calf Value), expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning performance from birth to weaning. Breed average is +59.

\$C (Combined Value), expressed in dollars per head, includes \$M and \$B with the objective that a producer will replace 20% of their breeding females per year with heifers retained, while the producer retains ownership of all remaining male and female progeny though the feedlot and sold on a carcass merit grid. Breed average is +243.

Dam's Production lists the number of calves measured from the dam and their average ratio for the given trait.

PERFORMANCE DATA

BW: Actual Birth Weight

WW: Weaning Weight adjusted to an age-constant of 205 days.

YW: Yearling Weight adjusted to an age-constant of 365 days.

SC: Scrotal Circumference adjusted to an age-constant of 365 days.

IMF: Percent Intramuscular Fat (indicator trait for Marbling) adjusted to an age constant of 365 days.

RE: Ribeye Area, measured in sq. cm, adjusted to an age constant of 365 days.

Ratio: Ranking within a contemporary group. A ratio of 100 is average for the group, while 105 is 5% above average for the group.

ABOUT^{THE} *Bulls*

The older age-advantaged bulls selling in this offering are genetically designed and developed for durability, longevity and athleticism to cover more cows on big country. Rather than feeding them for extreme weights, we have grown them sensibly and slowly.

From birth until sale day, all of the bulls are evaluated and culled for disposition, structural soundness, breeding soundness, performance and health, ensuring only the best of the best make the sale. All of the bulls selling have passed a semen test administered by Hoffman AI of Logan, UT.

REFERENCE SIRE
SQUARE B
Atlantis 8060

With each calf crop, Atlantis has increased his popularity across a wide spectrum of breeders - from those looking to balance early, accelerated growth with moderated mature size to those looking to improve type, kind, muscle expression and structural soundness. His oldest progeny exhibit incredible base width, tremendous muscle, outstanding depth and rib shape with an unmatched look.

Heifer safe with more than 130 progeny born to first-calf heifers and 87 first-calving daughters showing zero assists. The first Atlantis daughters in production have unmatched udder attachment and ideal teat size with 24 recording an average NR of 101.

The first progeny from Atlantis are in high-demand with sons, Judgement 1038 and Jake 1036, selling for \$180,000 and \$40,000, respectively, while seven daughters sold for an average of nearly \$22,000 in the 2022 Montana Maternal Revival Sale.

Selling 30 sons of Atlantis.

Selling one-half interest and one-half possession.

Dominant in both his phenotype and genotype, Kingdom 2294 is one of the top sire prospects ever developed in the program. Long-spined with abundant muscle and masculinity, Lot 1 was a top-performer with the #1 ADG of his calf crop coupled with ratios of WW 103; YW 110; ADG 122; IMF 139 and RE 106. In this offering, he posts the #1 ADG; #6 WW EPD; #8 YW EPD; #5 MB EPD; #3 \$C and the #2 Adj YW.

Having already successfully frozen semen, Kingdom 2294 was utilized heavily in the Fall breeding season at Montana Ranch and will be included in the 2024 semen marketing campaign.

His dam, a full sister to Glacier 9123, the popular 2nd high-seller of the 2020 sale, and to Rita 9052, the top-selling bred cow of the 2023 National Western Foundation Female Sale, is often described as the ideal Angus cow and records a progeny record of WR 2-107; YR 2-108; IMF 2-155; and RE 2-103.

Excels for traits which directly impact real-world profitability with breed rankings in the top 10% WW, YW and Claw; 15% HP, \$W and \$C; 25% PAP, RE and \$M; and 30% MB.

Selling full possession and two-thirds semen interest.

Killebrew 2049 follows in the footsteps of his famous full brothers, the \$180,000 Judgement 1038 and the \$40,000 Jake 1036, with a rare combination of flawless phenotypic design, unequalled maternal heritage and a unique EPD profile balancing optimum levels of performance with low BW and reduced mature size.

His Pathfinder Dam has progeny production record of WR 6-104; YR 6-107; IMF 20-101 and RE 20-105, including Joanie 1037, the \$70,000 valued full sister to Lot 2. Joanie 3063, at nine years of age, was the \$70,000 top-selling female of the 2022 Montana Ranch female sale.

Excels for traits which directly impact real-world profitability with breed rankings in the top 2% HS; 5% MM; 10% HP; 15% BW, Claw; \$M and \$W; and 25% reduced MW.

MONTANA
Kiner 2050

Atlantis X Joanie 3063

The mating of Atlantis to Joanie 3063 ranks as the most dominant for value and sales in the history of the program with progeny such as Lots 2-5 in this offering, as well as the \$180,000 Judgement 1038; the \$40,000 Jake 1036 and the \$70,000 Joanie 1037. Joanie 3063 is a big-middled, ultra-feminine Pathfinder Dam with a progeny record of WR 6-104; YR 6-107; IMF 20-101 and RE 20-105. As a nine-year-old cow, she was the \$70,000 top-selling cow of the 2022 female sale selected by ZWT Ranch in TN.

A bona-fide powerhouse, Koufax 2029 is a man among boys with unparalleled muscle expression and masculinity, while recording the #2 Adj WW and #10 YW EPD of the offering.

The proven and productive dam of Lot 6 is a foundation in the program and is a full sister to the dam of the \$270,000 Coleman Glacier 041. Donna 438 carries a progeny record of BW 6-95; WW 6-108; YW 4-107; RE 36-102, including sons Hi Power 0318, Junction 1017 and Jurisdiction 1317, all features of past sales, and ten daughters working alongside their dam in the Montana Ranch herd.

Koufax 2029 posted ratios of ADG 116 and RE 113, and ranks in the breed's top 5% HS; 10% RE; 15% WW and YW; 20% Claw; and 25% HP and \$W.

MONTANA RITA 7068 • Dam of Lots 10-12

MONTANA RITA 2070 • Maternal sister to Lot 10

A long-spined, smooth-made and attractive-patterned son of Atlantis, Kaat 2069 was produced from the sensational \$32,000 second high-selling cow of the 2022 female sale selected by Sunrise Farms of TX.

Showing the offering's #5 Adj WW and #8 WW EPD, Lot 10 earned a RE ratio of 112 and a spot in the breed's top 10% WW, HP and \$W; 15% \$M; 20% YW and 25% DMI.

His powerful dam shows a progeny record of WW 2-111; YW 2-105; IMF 16-103; RE 16-99. Her maternal sisters include Rita 9093, the dam of Lot 1 – Kingdom 2294, and Rita 9052, the top-selling bred cow of the 2023 National Western Foundation Sale.

UTILIZING THE BEST **SCIENCE** IN COMBINATION WITH GOOD, OLD-FASHIONED **COW SENSE** AND **INTENTIONALITY** IN BUILDING PEDIGREES.

Two outstanding full brothers produced from the powerful \$32,000 Rita 7068 whose progeny earn WW 2-111; YW 2-105; IMF 16-103; RE 16-99. Kingdom 2294, Lot 1 in this offering, was produced from a maternal sister to Rita 7068, along with Rita 9052, the top-selling bred cow of the 2023 National Western Foundation Sale.

Selling full possession and two-thirds semen interest.

The first son from the powerful Donna 781 whose 12 progeny show an IMF ratio of 118, Kevlar 2043 is tremendously balanced in every sense. We've anticipated a great son from 781. Kevlar may be just that. Lot 20 is double-bred to the breed's all-time great dam, Blackcap May 4136, and he boasts a pedigree that has great dams in every direction.

Recording an IMF ratio of 116, Kevlar 2043 earns a place in the breed's top 10% for Claw and HS; 15% for RE; 20% for WW; and 25% for YW.

REFERENCE SIRE

SITZ *Stellar* 726D

One of the most useful outcross, maternal sires we've used, Stellar 726D is a sire which excels for traits most associated with longevity and maternal function. The first Stellar daughters calved in the program are maternally attentive with unsurpassed udder quality and near ideal teat size. Sons of Stellar are great footed and athletic with tremendous phenotypic balance. A son, Montana Jet 1271, has been used extensively in the program and will figure greatly in our future.

MONTANA
Kelly 2036

The full brothers selling as Lots 21-23 are among the most consistent high-quality sets of full siblings we've ever produced. They are the result of mating Stellar with the foundation Donna 505, a powerhouse Resource daughter from the proven and prolific Donna 714.

Maternal brothers include the top-selling bulls, Fred 8207 at Koupal Angus and Foreman 8076 at Little Goose Ranch, in the 2019 sale. Maternal sisters include numerous top-sellers in the program including Donna 2220 at Glenmary Farms in VA; Donna 7001 at Thomson Land and Livestock in ID; Donna 0204 and Donna 1217 at Faith Farms in TN; and Donna 9210 at ZWT Ranch in TN.

Consigned by Grace Elverud.

This long-bodied, smooth-made and athletic son of Benchmark was the first calf produced from Grace Elverud's 2021 Grand Champion NILE Merit Heifer, Rita 0064. As a calf, Lot 33 was the Reserve Grand Champion Bull in the Jr. Bred and Owned Show at the 2022 NILE.

His dam, a maternal sister to Montana Goodnight 9036, a popular third high-seller of the 2021 sale, has subsequently been successfully campaigned winning Grand Champion Cow-Calf Pair of the 2023 Montana Fair where her daughter captured Reserve Grand Champion Bred and Owned Female as a spring calf.

Extremely docile and halter-broke, Lot 33 ranks in the breed's top 15% for CED and \$W; the top 25% for WW and the top 30% for YW.

REFERENCE SIRE

SITZ *Logo* 8148

Introduced into the program as an outcross source of low birthweight and high growth genetics, Logo 8148 blends the breed leading sire for \$Maternal, Logo 12694, with a productive Pathfinder Dam.

Ranking in the breed's elite sires for the combination of HP and PAP, Logo 8148 transmits tremendous early growth in a moderate-framed, good-footed and heavy-muscled package.

COLEMAN DONNA 4356 • Dam of Lot 40

Densely-made and absolutely flawless in his type, Keen 2055 blends the popular Pathfinder Sire, Net Worth, with the foundation Donna 4356, the productive full sister to the \$450,000 Coleman Bravo 6313.

Easy-fleshing, exquisitely feminine and docile, his dam earns a progeny record of BR 3-85; WR 3-101; YR 3-99; IMF 33-105; and RE 33-101, including Global 9129, a featured herd sire in the 2020 sale selected by Monadnock Farms, SC; Goddard Farms, NC; and Strommen Ranch, ND; Foundation 8067 at Little Goose Ranch; Homeward 0075, a featured herd sire at Leadore Angus Ranch; and Donna 8090, the top-selling bred heifer of the 2019 sale.

With the offering's #6 \$Maternal, Lot 40 earned an ADG ratio of 110 and ranks in the breed's top 3% for \$M; the top 5% for reduced MW; the top 10% for CED, HP and \$EN; the top 15% for Claw, DMI and MM; and the top 20% for BW.

BROOKING
Revival 0074

The Lot 1 bull of the 2021 Brooking Angus Ranch sale in SK, Revival blends Renovation with the famous Rose 1019 into a fantastic phenotypic package backed by proven maternal quality. From a pedigree that runs rich in many of the breed's preeminent dams for productivity, Revival is deep-sided and smooth-made with abundant muscle and fantastic breed character.

Used in many of the nation's most respected maternally-oriented herds, the first calf crop from Revival shows great promise for improved structural soundness, added muscle, depth of rib and stunning good looks.

A stout-made Prosperity son produced from the great Donna 505, Lot 58 is a maternal brother to the 2019 top-selling bulls, Fred 8207 at Koupal Angus and Foreman 8076 at Little Goose Ranch. His maternal sisters include numerous top-sellers in the program such as Donna 2220 at Glenmary Farms in VA; Donna 7001 at Thomson Land and Livestock in ID; Donna 0204 and Donna 1217 at Faith Farms in TN; and Donna 9210 at ZWT Ranch in TN.

Ranks in the breed's top 20% for reduced MW and the top 30% for both DMI and PAP.

MONTANA DONNA 2215 • Full Sister to Lot 58

REFERENCE SIRE

KOUPALS B&B
Pathfinder 8106

MONTANA DONNA 1243 • Daughter of Pathfinder

Stacking five consecutive generations of Pathfinder Dams, noted for their productivity, fertility, unparalleled structure and udder quality, Pathfinder is a unique low BW, high-growth sire that has found widespread popularity as a sire in heifer projects from coast to coast.

Pathfinder progeny show ratios of BR 769-98; WR 700-101; YR 402-101; IMF 280-100 and RE 280-101, while his first 40 daughters in production earn an avg NR of 102.

Sons of Pathfinder include LT Chiefton 1440, the \$95,000 top-selling bull in the 2022 LT sale; Koupals B&B Trailboss 1048, the \$50,000 top-seller at the 2022 Koupal sale; and Montana Honcho 0223, the top-selling bull of the 2021 Montana sale. The first Pathfinder daughter to sell at auction was Montana Blackcap May 0021, the \$21,000 2nd high-selling bred heifer, going to Faith Farms of TN.

Maternal genetics at it's best! Lot 62 weaned at 57% of his dam's weight with a ratio of 101. His dam, a full sister to Gibson 9111, is right-sized, superior-uddered and ultra-feminine with a progeny record of WW 2-103; YW 2-100; IMF 2-108; RE 2-100 and calving interval of 352 days.

Lot 62 ranks in the breed's top 15% for HS; the top 25% for MM and the top 30% for YW.

REFERENCE SIRE

MONTANA *Outcross* 9077

The top-selling Lot 1 bull of the 2020 Montana Ranch sale, Outcross 9077 is a blending of the Pathfinder maternal sire, Density, with a dam bred in the famed Tres Marias herd in Argentina. Intensely line-bred to Erica 2862 and Kate 2208, both foundation females at Tres Marias, the dam of Outcross is sired by Zorzal, a Palermo Supreme Champion and dominant sire in South America.

Progeny from Outcross have outperformed his AAA genetic predictions and are long-spined with flawless structure and unmatched breed character. The first daughters from Outcross calved this summer with unmatched udder quality and are raising impressive calves.

Dakota 2528

Larger-framed with added muscle shape and unparalleled good disposition, Dakota 2528 was produced by a Pathfinder Dam and is backed by multiple generations of productive and proven dams.

Dakota progeny are extremely docile with ideal hoof structure, optimum levels of growth and unmistakable good looks. Sons are heavy-muscled with exceptional masculinity and breed character. The first daughters of Dakota in production are productive, good-uddered and easy-fleshing.

Checking in with the #1 Milk EPD of the offering, Lot 73 is a low-BW maternal brother to Judgement and Jake ranking in the breed's elite 1% for MM; the top 10% for \$W; the top 15% for HS; and the top 20% for reduced MW.

The three tremendous full brothers selling as Lots 72-74 are the result of mating the balanced-trait Dakota to the productive and proven Joanie 3063, who posts a progeny record of WR 6-104; YR 6-107; IMF 20-101 and RE 20-105.

Maternal siblings include the \$180,000 Judgement 1038; the \$40,000 Jake 1036; the \$70,000 valued Joanie 1037; and the \$21,000 Joanie 1041. Their dam, Joanie 3063, was the \$70,000 top-selling cow of the 2022 female sale as a nine-year-old.

A multi-trait standout, Kalispell 2246 rings the bell for a wide variety of traits posting the offering's #1 \$M; #2 HP EPD; #3 WW EPD; #3 \$M; #4 YW EPD; #4 \$C; and #5 RE EPD.

Weaning at 57% of his dam's weight, Lot 76 followed it with ratios of ADG 106 and YW 102. His ultra-feminine, wedge-shaped and ideal-uddered dam is a daughter of the foundation Donna 4356, the full sister to the \$450,000 Bravo 2313.

Holds breed rankings in the top 1% for HP and \$M; 3% \$W; 4% RE; 5% WW; 10% YW; and the top 15% Claw and \$C.

REFERENCE SIRE
TEHAMA
Patriarch F028

Introduced into the program as a fresh source of outcross low birthweight genetics without sacrificing fertility and maternal traits, Patriarch sires progeny which are long-spined, smooth in their construction and athletic.

With a terrific balance of EPDs, Patriarch ranks in the breed's top 2% for HP; the top 4% CED; the top 5% for \$M; the top 10% for BW and \$C; the top 15% for \$W; the top 20% for RE; and the top 25% for MM, Claw and MB.

Extremely complete and superbly attractive, Density 2103 carries a pedigree stacked with the best maternal genetics in the business. He was produced from a dam who blends Charlo with a full sister to the Pathfinder Sire, Resource. Her progeny earn a record of WW 3-101; YW 2-102 and include Headland 0011, a featured sire in the Fields Angus and SimAngus program in OR.

MONTANA Rider Pride 2098

MONTANA DONNA 2091
Maternal sister to Lots 82-84

The three full brothers selling as Lots 82-84, sired by high-growth sire, Rider Pride 7282, were produced by the second-generation embryo donor in the program, Donna 8091. Their dam, a daughter of the \$235,000 Citation, is deep-sided and feminine with a terrific udder. Her progeny earn her a record of BW 2-90; WW 2-110; YW 1-111.

Produced from an outstanding first calf dam sired combining Extension with a powerful daughter of Resource, Lot 105 is sired by the featured Montana, SAV and Mystic Hill sire, Benchmark.

Queen Dolly 2370 ranks in the breed's top 10% for \$M, \$W and HP; the top 15% for WW; and the top 25% for YW, HS and Claw.

MILL BRAE BENCHMARK 9016 • Sire of Lot 105

Backed by five consecutive generations of Pathfinder Dams, Pathfinder 8106 is one of the most intriguing maternal sires in the business. Donna 2367 has all of the ingredients to be a tremendous producer. Her dam, a daughter of the foundation Donna 438, has a progeny record of BW 2-97; WW 2-105; YW 2-103; IMF 2-101; RE 2-105.
