

ENTERPRISE ARCHITECTURE

SOLUTIONS

n-Link offers a holistic model-based approach to Enterprise Architecture (EA) that aligns to the Federal Enterprise Architecture (FEA) that is based on The Open Group Architecture Framework (TOGAF) Architecture Development Method (ADM) and applies Agile-like development processes.

We design and implement innovative staffing solutions by augmenting part-time and on-call staff to significantly reduce budget expenses while also meeting surge requirements.

CAPABILITIES

EA Best Practices:

- ✓ We follow Federal Enterprise Architecture
- ✓ We use Agile software development
- ✓ We strike a balance between the rigorous application of theory and the practical focus of providing a tailored customer solution
- ✓ Our team prioritizes data repository and software re-use
- ✓ Our total project management prioritizes quality assurance for continuous process improvement

CUSTOMERS

U.S. Department of Agriculture (USDA), Farm Services Agency (FSA)

n-Link supported 40,000 USDA FSA users through our with FSA's Architecture and Management Center contract within the Information Technology Services Division. Providing critical leadership and defining and influencing the architectures underlying the Agency's most critical investments, n-Link created FSA's Enterprise Architecture Repository – now the best-available integrated information resource of describing over 130,000 organizational artifacts covering FSA's structure, mission, assets and operations. We contributed to standardization, reuse and strategic initiatives leading to well-defined USDA FSAIT structures.

CASE STUDY

At Housing and Urban Development (HUD), we developed and documented software engineering practices for requirements management, software builds, software configuration management, software releases, software testing, daily system tests, and software ticketing/maintenance work flows. *Over the life of the contract, n-Link reduced contractor staff each year (over 50% total), resulting in cost savings to the Government.*

CORPORATE SUMMARY

Services Overview

C4ISR / UAS

Aerial Data Collection/Management, Sensor Integration, Imagery Analysis/Visualization, Actionable Intelligence, Unmanned Flight Operations, and Policy, Exemption, and Course of Action Support

Information Technology & S/W

Network Operations Centers, Website & Portal Development, SharePoint / Collaboration, Knowledge Management, Wireless Design/Implementation, Open Source Software, J2EE, .NET, Agile, and Mobile Applications

Enterprise Architecture

MEGA (a tool Suite) Certified, Organizational Artifact Repositories, As-is and To-be Transitional Modeling, Requirement Management, and Federal Enterprise Architecture & Systems Development Life Cycle Methodology Experts

Cyber Security

Security Operations Centers, Deep Web/Dark Web Monitoring, Penetration Testing, Certified Ethical Hacker certified, Federal Information Security Management Act / Federal Risk and Authorization Management Program, Risk Management Framework, Certification and Accreditation, and Disaster Recovery

Program Management

Project Management Office Support, Requirements Development, Financial Management / Budgeting, Risk Management, Systems Engineering and Technical Assistance / Independent Verification and Validation, and Earned Value Management

Training/Human Performance

Training Facility Management, Instructional Design, Content Delivery, Classroom Training, and IMI/Distributed Learning

Identity Management

e-Authentication, Public Key Infrastructure/Personal Identity Verification, and Homeland Security Presidential Directive-12
