Hampden Instrument/Storage/Tool Cabinets

Series HMB Storage/Demonstration Benches—Extra Heavy-duty construction designed for rugged use with plenty of storage and working area. These are the same benches we use with our own best training equipment. Available with or without lockable doors. Constructed of code gauge furniture stock steel, finished in instrument tan texture enamel, with a 1" wood core top covered with plastic laminate.

Model	Shelves	Doors	H	W	D
HMB-4020	2 (1 Adj)	Lockable	36"	40"	20"
HMB-4828	1 Fixed	Lockable	36"	48"	28"
HMB-7028	None	Lockable	36"	70"	28"
HMB-100 RCB	1 Fixed	None	36"	60"	30"

Hampden's Series HMT & HMC Mobile Equipment Benches provide extra-tough construction with the highest grade of materials for unparalleled functionality and durability.

Series HMT Equipment Benches may be mobile (as shown) or stationary. Benches are constructed of code gauge furniture stock steel, finished in grey hammertone enamel, with a 1" wood core top covered with plastic laminate. Contains a full width drawer for convenient storage of leads and additional equipment.

Series HMT Equipment Benches
An exceptionally versatile and popular addition to any lab. Lockable casters and large work surfaces.

	W	D	H
HMT-3	36"	24"	36"
HMT-4	48"	24"	36"
HMT-5	60"	30"	36"

Series HMC Equipment Carts
12-gauge steel welded construction, Double backed flanges and optional AC outlets.

	W	D	H
HMC-2	24"	24"	34"
HMC-3	38"	24"	34"
HMC-4	42"	24"	34"

Add Suffix PC for built-in AC outlets

Series HMC Mobile Equipment Carts provide a convenient way to transport equipment from storage to the point of use. The large units are frequently used as mobile work stations. The carts are rigidly constructed of 12-gauge steel. The raised flanges of the shelves are doubled back for strength and to present smooth edges. The carts are **welded**, not bolted together. Finish is grey hammertone enamel. A rubber mat is provided on the top shelf. Two fixed and two swivel, with brakes, 4" casters are provided. AC outlets and power cord can be "built-in", as an option: **Model HMC-PC**.

All Hampden units are available for operation at any voltage or frequency

Hampden Storage & Tool Cabinets

From The Makers of The Best Educational Training Equipment In The World!

We design and build tool cabinets to grow with your needs. Our factory specialists know just what your curriculum requires and have designed these cabinets to give you the space and versatility you want.

MODEL 262-IC Instrument Cabinet contains four adjustable shelves and four drawers for storing meters, scopes, and other portable test equipment. The upper portion has two lockable doors with pulls. The lower portion consists of four 15½" wide, lockable steel drawers with roller glides and recessed handles. The cabinet, including drawer fronts, is constructed of wood core, finished in English Oak plastic laminate.

MODEL 262-SC Storage Cabinet (shown) contains five adjustable shelves for storing portable shop equipment. The cabinet has two full-length lockable doors with concealed pulls. Cabinets are constructed of wood core, finished with plastic laminate.

MODEL 262-SC-TC Tool Cabinet contains two adjustable shelves for storing tool boxes, boxed tool sets, and large tools, such as drills. The upper portion contains metal brackets for neat and orderly storage of small tools. The standard selection of first-quality U.S. manufactured tools may be furnished. The cabinet has two full-length lockable doors with concealed pulls. The cabinet is constructed of wood core finished with plastic laminate.

Tool Sets—The Hampden Tool Cabinets can be supplied with various tool sets, as follows:

- The Hampden **MODEL 262-SC-TC-L** Electrical Tool Cabinet is provided with electrician's tools and other tools used in the electrical shop. Shipping weight: (with tools): 900 lbs.
- The Hampden **MODEL 262-SC-TC-C** Electronic Tool Cabinet (shown) is provided with tools used in electronics laboratories. Shipping weight: (with tools): 700 lbs.
- The Hampden **MODEL 262-SC-TC-A/C** Air Conditioning Tool Cabinet is provided with tools used in Air Conditioning/Refrigeration shops. Shipping weight: (with tools): 800 lbs.

Model	Description	H	W	D
