

SOARING KIDZ

Eligibility Form

Currently there are no diagnosis restrictions or mobility restrictions that eliminate a child from participation in our programs. There are certain classes that are more appropriate for some children based on level of mobility and cognitive age level.

Although there are no restrictions based purely on diagnosis or mobility there are requirements for participation in **SOARING KIDZ** activities and they are:

- ❖ Participant must have the personal desire to perform the activities within each program
- ❖ Participant will not prevent the instructor from teaching
- ❖ Participant will not prevent other participants from learning or participating
- ❖ Participant must demonstrate a willingness to cooperate and function in a group setting and be able to follow directions
- ❖ Participant must pose no threat or danger to self or others before, during, or after participation in our activities
- ❖ Participant must be medically stable to participate in the desired activity and have clearance from their medical doctor for such participation.

SOARING KIDZ reserves the right to remove any child from the program who does not meet the basic criteria. Appropriate placement into an alternate class will be attempted, but we must keep the safety of the group as a guiding priority. If one of the instructors must give an inordinate amount of time to a child who is not suitable for the program, that situation compromises the safety as well as the enjoyment of the group as a whole.
