DAKOTA SUPPLIES EXPANDS SALES & DISTRIBUTION IN CHINA WITH MOPPITT® CHINA PTY

Dakota Supplies of Canada, in a partnership with its manufacturing supplier, Strong Holdings Group, has created a Chinese-based subsidiary for the distribution of moppitt® products to the hotel, rail, RV, medical and other relevant industries directly within the Republic of China.

As a new entity, **moppitt® China PTY**, is launching a new sales and marketing team to identify product gaps within the Chinese target markets, specifically those looking at innovative products for industries that require small space quick cleans.

The moppitt® is an innovative new way to clean. Touch-less and compact, the all-in-one cleaning system has revolutionized traditional cleaning methods. The user can effectively clean lavatory seats, sinks, tables and floors without ever touching the contaminated surface which is a more hygienic way to clean. They also do not have to get down on their hands and knees with rags to clean. The extendable pole provides an easy way to clean hard to reach surfaces. Eliminate slips, trips and falls and worry less about the mess!

About moppitt® China

moppitt® China will be an independent subsidiary of Strong Holding Group, a company that was established in 1994 and is located in the province in Zhejiang, China. They manufacture products for many household brands. Besides developing new products with clients and researching advanced technical processes in the plastic industry, they also make OEM parts for customers. They are a low-cost manufacturer that has earned the trust of customers by providing quality products and by pursuing aggressive development of profitable business opportunities.

About Dakota Supplies Inc. and moppitt

Dakota Supplies is a Canadian company, developer, and distributor of cleaning solutions for commercial transportation (airline, train, bus, coach, RV) and hospitality (hotels, restaurant) industries with a product called moppitt® compliments the multibillion-dollar transportation industry addressing an unmet market need to help customers: improve health and safety and protect their brand and corporate assets through enhanced cleanliness.
