

WALL STREET TEMPLES OF MAMMON

The purpose of this illustration is to show another rendition of Orion's Belt 3-pyramid alignment as incorporated in the heart of Wall Street temples of Mammon. An in ancient time, the Luciferians built their pyramids aligned to the stars based on certain constellations of importance. Some aspects of the alignments followed sacred Earth energy ley-lines to influence political and/or financial gain and power over the masses. It is no different today expect the 'Builders' place their temples and pyramids atop skyscrapers. What this study suggests is that he financial center of the world has incorporated the Great Pyramid of Giza pyramid alignment surrounded by a Babylonian styled ziggurat as well. The degree of inclination from north is at a 33 degree heading. In essence, the economy, religion and political framework of the spirit of Babylon and Egypt is alive and well in the America, for the time being. Based on the Sabbatical cycle of this American New World Order Phoenix, the cabal of Money Changers are about to find a host to suck the life blood out of their next victims, thus the need for a New World Order. The 3 pyramids atop the skyline correspond to the commodities the Disciples of Mammon manipulate and use to control the world with, Gold, Silver and Oil.

The classic 3 pyramid alignment that is modeled after Giza in Egypt is very ancient and is replicated all over the world. What the pyramids also depicts is based on their color type, the heavenly bodies; the Sun, Moon and the Stars. This motif is seen most notably in such temple centers as Teotihuacan and the Temple Mount of Jerusalem. The distance from the Black pyramid to the center silver pyramid corresponds to the Silver color and the star in Orion of Bellatrix. In terms of distance there are obvious Luciferian numerical signatures and that of 9-11 apparently.
