

SHEYENNE RIVER VALLEY REGIONAL ENVIROTHON OCTOBER 1 AT VALLEY CITY STATE UNIVERSITY

The Envirothon is North America's leading natural resource education program for high school students, emphasizing hands-on, team-oriented problem solving and community involvement that prepares young people for environmental careers and active citizenship.

Trail Test: In the morning, teams of 5 students take a trail test based on the study resources on our website.

Students prepare 10-minute presentations in advance of the competition answering questions related to the current issue scenario.

Education Stations: Students and advisors rotate around 3 hands-on stations during the afternoon portion of the event.

The ND Envirothon focuses on the conservation of forest, water, wildlife, prairies, and soil resources, and on community environmental issues. The envirothon is a great way to bring the classroom outside and works with many science curriculums.

'promoting a desire to learn about natural resources'

Groups of 5 classmates learn and compete as a team during the one-day event. Schools can send as many teams as they want to this event.
