Essential & Fragrance Oils

Our oils are completely uncut. This means we never dilute our oils with any alcohol, carrier oils, vegetable or petroleum oils. Each is full strength and may be diluted with anything you'd like. Some oils are inappropriate for application on the skin, these are labeled as HOT. These I would not use on the skin, even if diluted.

Anything you put on your skin should be skin tested for 10-20 minutes for allergic reaction. The key below is an explanation of each oil we carry.

KEY

E:Essential Essential Oils are derived from organic plant materials.

EB: Essential Blend Essential Blends are our own essential oil blends containing only essential oils in a harmonious blend of two or more to create a unique and exotic scent for body massage, aromatherapy and some therapeutic applications. Blended compounds using particular essential oils for their therapeutic purposes are especially healing in baths and body wraps.

EC: Essential Compounds Essential Compounds are a harmonious blend of two or more essential oils of the same plant genus. Blended compounds using particular essential oils for their therapeutic purposes are especially healing in baths and body wraps.

B:Blend Our original Blends are unique to Wood, Willow & Whatknots. They can contain any combination of Essential Oils, Essential Compounds or Fragrance Oils.

F:Fragrance Fragrance oils are man made from synthetic compounds to simulate the true plant essence.

WARNING Oils labeled **HOT** means they **CANNOT** be worn "neat", or directly on the skin, without first blending them with a carrier oil or other dilution. All oils should be skin tested prior to further use to ensure no negative reaction, irritation or rash would occur. We are not responsible for any reaction to any of our products used.

USE AT YOUR OWN RISK.
