VetTech, Assistant, Reception FT, PT, Saturdays

I am looking for an experienced veterinary technician/assistant who can assist in a hybrid veterinary practice (we are building a clinic and will continue a mobile veterinary practice). Day to day activities will include seeing appointments, laboratory analysis, animal restraint, phlebotomy, packing and labeling medication, animal husbandry, client education, medicine administration, administrative responsibility, x-ray processing, ultra-sonography assistance etc.

I will also be performing surgery several days a week and will need help with surgical responsibilities: basic canine and feline dentistry, catheter placement, running blood work and collecting samples, surgical assistance, basic record keeping, etc.

I have 13 years of Veterinary experience in the Metro Atlanta area in traditional ""Brick-and-Mortar"" practices. Several of these practices were voted ""Best Practices in Atlanta"" by Atlanta magazine. I am looking for an experienced assistant/technician that can work either full or part time in the Marietta/East Cobb area.
