

PRODUCT SPECIFICATION SHEET

Description

- PSF Plus is a premium puncture sealant that can be used in a wide range of applications and temperatures. It is a lab-tested and field-proven liquid tire sealant that quickly and effectively seals punctures up to 1/4" diameter. In addition to its puncture sealing capabilities it will protect the wheel/rim from rust and help maintain tire pressure.

Uses/Benefits

- Can be used in low speed and high speed applications.
- Helps maintain air pressure resulting in improved fuel efficiency and tire wear.
- Prevents rust.
- Reduces downtime.
- Does not separate.
- Freeze/thaw stable.

Freeze Point

- -20°F/-28°C

Available Packaging

- 32-ounce bottles
- 1-gallon jugs
- 6-gallon pails
- 55-gallon drums
- 275-gallon totes
- 330-gallon totes

Limitations

- PSF Plus is not intended to permanently repair a damaged tire.
- Not for use in passenger vehicles.
