NMMA® 2020 CSI Award Recipient for Customer Satisfaction Aluminum Boats Industry Leading 18 Consecutive Years

The Certified Advantage The NMMA® Certified label on a G3 Boat lets you know it was built to meet and often exceed, strict quality and safety standards established by the U.S. Coast Guard and the American Boat and Yacht Council. These standards include 31 categories covering electrical systems, powering, flotation, fuel systems and navigation lights. Certified boats must also pass rigorous annual inspections from independent third-party inspectors. As a result, U.S. Coast Guard statistics show NMMA® Certified boats have been shown to be safer than non-certified boats.

suncatcherpontoon.com

Every element of the new AMARA by G3 consists of the highest quality features, including Simrad® electronics, Polk® 6-speaker audio system with subwoofer. There is also the option of pairing the boat with the powerful Yamaha 425 XTO Offshore® motor for the ultimate in performance. Introduce your family and friends to a higher level of rejuvenation and reward: introduce them to AMARA.

SUNCATCHER® OPTIONS

INTERIOR OPTIONS

Slider refreshment center opens up to reveal cooler / storage area under table top.

Oval wood grain table has deep cup holders and a molded lip helps prevent spills. It also features a SeaDek® mat with SunCatcher branding. Available on Elite, Fusion and Select models.

Bow couch insert completes the wrap-around furniture group for maximum comfort and convenience.

Drop in storage trays add a second layer for quick access to small items.

The optional couch storage system includes a trash can, drawer storage, tackle tray storage, fold out table or privacy enclosure. This feature allows you to customize the boat on how you are going to use it. Available in Elite, Fusion and Select Series pontoons with full port bow couches.

EXTERIOR OPTIONS

Stainless steel ladder is an upgraded option for Fusion and Select Series pontoons. Standard on Elite Series.

Ski tow bar is available on 2 log non-fish models. Comes standard on all 3 log pontoons.

Elite, Fusion and Select Series pontoons can add the popular black painted rails on any model 22 ft and up.

Select from painted or galvanized trailers for your new pontoon. Spare tire with carrier also available for every SunCatcher package.

One popular upgrade for the Select Series is the Docking /Navigation light set that is standard on the SunCatcher Fusion Series.

Upgrade your comfort with the 26" high back reclining helm seat, available to match your choice of interior colors.

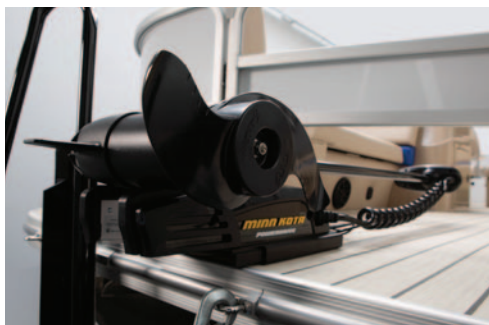

Navico® Marine Electronics can outfit your new V Series pontoon with Simrad® or Lowrance® GPS navigation and quality sonar for fishing.

The optional Diamond Elite package is available for the performance driven customer with a dash upgrade that includes a backlit G3 decal, Simrad GO9 display and Seastar control panel. The Diamond Package also offers a max HP of 300 which includes the Yamaha DEC controls.

A new stereo upgrade featuring a Marine Audio® MA110 head unit and 4 MSX65 speakers that can be paired with the new RGB lighting option on 22 ft and up non-fish pontoon models. Option available on Fusion and Select Series pontoons.

Choose from a selection of quality Minn Kota® trolling motors for your next pontoon fishing adventure.

Every model can be upgraded to a Saltwater Series, and include protective anodes on each log, as well as a full-length under-deck performance shield.

Tandem Axle Trailer w/ Brakes is available in black (painted) or galvanized. Black logs are available as options on Elite Series pontoons.

Popular options include custom tandem axle trailer with brakes, and a bow canopy for maximum shade.

Optional Sunbrella® mooring cover available for all Elite Series pontoons.

An optional upgrade for Elite Series pontoons is the power bimini. This automatic bimini deploys and retracts with the touch of a button taking the hassle out of deploying and stowing bimini tops.

Mooring covers by Dowco, Inc. feature quick and secure Rail-Lok™ fasteners, which lock and unlock with just a squeeze.

SUNCATCHER® CONSTRUCTION

SUNCATCHER FOUNDATION There are as many ways to build a pontoon as there are ways to build a house, and the quality of both depend on building on a solid foundation.

The best way to have a superior foundation when building a superior pontoon boat is by through-bolting one-piece extruded cross members directly to the top of “U”-shaped flotation logs. This is a more labor intensive method of construction and very few pontoon manufacturers pursue this method.

SunCatcher construction not only through-bolts all cross members directly to high-volume “U”-shaped logs, but also attaches all cross members 16” on-center, for the full length of the boat. Others often use 16” OC only for their premium series, or not at all.

G3 uses 16” OC cross members for all models, and this provides unsurpassed strength and rigidity for all SunCatcher foundations.

Other manufacturers using spot-welded “M”-shaped brackets, are compensating for the lack of flat surface space on top of a round pontoon log, and are creating an artificial flat platform on which they place cross members and attach a deck. This spot

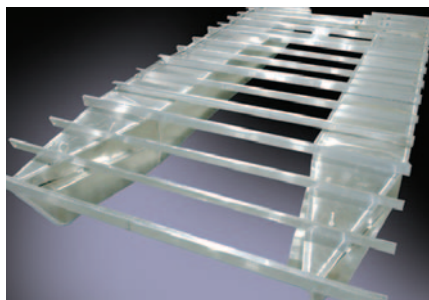

welding makes the “M” brackets inherently weaker than the SunCatcher “U”-Log construction method.

“U”-shaped logs sit higher in the water with less drag on the side of the pontoon. This results in more efficient use of fuel, and higher performance, than the low-volume round logs many manufacturers use to save costs. SunCatcher pontoons give you “quality you can trust” due to all of these reasons.

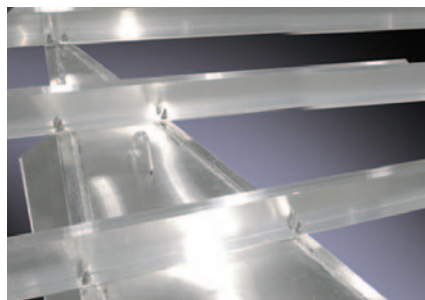

FLOTATION BLOCKS With the additional closed-cell foam flotation blocks inside the logs, SunCatcher construction goes above and beyond the industry standard. Even the Coast Guard does not require the additional foam flotation found in all SunCatcher pontoons, we add it simply for your family’s peace of mind. It is called “redundant flotation” and it means that unlike air-filled round logs, you will always have “back-up” flotation even in the unlikely event of a log puncture.

These lightweight foam blocks DO NOT absorb water and add even more rigidity to the log, which eliminates flex and increases performance.

NOSECONES A word about nosecones. Very few manufacturers go to the

One-piece extruded cross members form a solid foundation

Cross members through-bolted to full length of deck and nosecone

Closed-cell foam flotation

Heavier gauge nosecones provide added durability

On performance stats, speed varies depending on many factors including water conditions, engine maintenance, operator experience, and on-board weight.

This documents contains many of G3’s valuable trademarks. It may also contain trademarks belonging to other companies. Any references to the companies or their products are for identification purposes only, and are not intended to be an endorsement.

trouble of making nosecones out of a heavier gauge material than their logs. We like the added durability, so all SunCatcher pontoons feature heavier gauge nosecones.

SUNCATCHER DECKS All SunCatcher decks extend right to the end of the pontoon log, and the very tip of each nosecone is through-bolted directly to a cross member. Not only does this add to the overall strength of the pontoon foundation, but it also gives you the maximum deck space available.

When you buy a 26' SunCatcher pontoon, you are getting a full 26' deck, not a 24' deck and a foot or two of extended nosecone. In addition, all of our pontoon decking is top-quality 7-ply marine grade treated plywood, with a limited lifetime guarantee direct from the manufacturer. There is no cost to the consumer for labor or materials for the first TEN years of ownership should warranty work need to be scheduled on the deck of a SunCatcher pontoon. After that period, only labor charges will apply. Replacement decking is covered for as long as the original buyer owns the pontoon.

UNDER-DECK PERFORMANCE SHIELDS All Fusion Series and Elite models feature full-length under-deck performance shields as standard

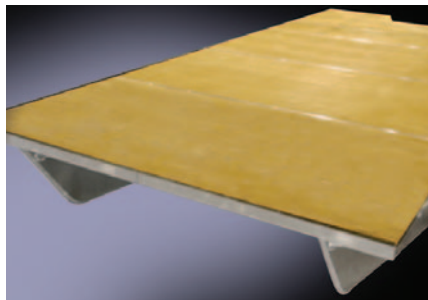

equipment, unlike many boat builders. These shields add value by increasing fuel efficiency, speed, and durability. High-performance full-length lifting strakes are also standard equipment on all tri-log models.

SUPERIOR QUALITY There is an extremely easy way to compare pontoon construction. Simply look under the trim band in the bow of the boat.

Are the logs tied to the frame, are the nosecones an intricate part of the construction, are cross members extended out to the trim for support and are they reinforced, or welded to the trim band? The answer to all, when you look at SunCatcher, is YES.

Look closely at the anodized deck rails and trim. Spacers under the rails allow rainwater to escape from the deck, welds are precise and well placed, and convenient lift-up gates have positive stops, open inward, and are reinforced with additional bracing.

It's that attention to detail that adds up to superior quality, and as a result, gives you superior value in a SunCatcher pontoon.

Top-quality 7-ply marine grade treated plywood

Under-deck performance shields on all Fusion Series and Elite models

Reinforced construction means superior quality

Follow instructional materials and obey all laws. Ride responsibly, wearing protective apparel and USCG approved personal flotation device. Always drive within your capabilities, allowing time and distance for maneuvering, and respect others around you. Never drink and ride.

Boat smart from the start, take a boating safety course and get a free vessel safety check annually for your boat. For more information, contact United States Coast Guard at www.uscgboating.org or United States Power Squadrons, 888-for-usps.
