

### DESCRIPTION

TRANSHIELD is a crystal clear, penetrating sealer and water repellent that is formulated to provide durable, long lasting protection to above grade brick, concrete, stucco, EIFS (synthetic stucco), block (CMU) and other masonry surfaces.

TRANSHIELD is effective without changing the appearance of surfaces. It will not discolor the surface and stays completely clear over long periods of exposure.

TRANSHIELD increases the life and durability of any surface by locking out abrasive dirt and other substances (including mildew, algae and other pollutants) from the pores of the surface.

TRANSHIELD contains special additives that RETARD THE GROWTH OF MILDEW, MOLD, ALGAE AND OTHER SPORES. These additives will remain active for approximately five years.

### ADVANTAGES

- Safe on E.I.F.S. (Synthetic Stucco)
- Durable and Long Lasting
- Crystal Clear
- Will Not Discolor Surface
- Vapor Permeable
- Dirt and Pollutants Will Wash in Rain
- RETARDS THE GROWTH OF MOLD, MILDEW AND ALGAE
- Excellent Coverage
- Meets ASTM-C-140, E-96, E-514
- V.O.C. COMPLIANT

### WHERE TO USE

- Wet and Humid Climates
- E.I.F.S.
- On all Masonry
