

TOP DRIVE TESTING HEAD

Product No. 0704-057X01-DA

The **Top Drive Testing Head** assembly is installed on the top joint of drill pipe at surface to provide a flow control device which allows operators to safely conduct drillstem tests. The pneumatic or hydraulic actuated ball valve provides a spring close fail safe. It is with a Swivel Assembly. Optional equipment is a Bar Drop Sub, Master Ball Valve Assembly, Remote Control Valve Assembly, and a Lift Nipple. The Testing Head is manufactured to NACE MR01-75 Specifications.
