“NO CASH, NO SPLASH” Policy: No vessel is launched without payment in full of slip and mooring rentals, and any outstanding balances. If FHYW is compelled to move any boat obstructing its operations, a charge of \$12.00 per foot will be assessed. FHYW is not responsible for a boat leaking after launching. A charge commensurate of labor and services will be assessed for services in effort to make boat floatable. In the event leak is too severe and boat must be hauled, a hauling charge will be assessed accordingly. No additional work will be done on your boat without a signed authorization work order. NO OUTSIDE CONTRACTORS WILL BE PERMITTED TO WORK ON BOAT WITHOUT APPROVAL, PRIOR ARRANGEMENT, AUTHORIZATION AND PROPER INSURANCE (additional charges apply). See clause #8 on storage contract.

I authorize the completion of work (along with the necessary materials) specified above and grant employees or subcontractors of FHYW permission to operate the vessel/engine for that purpose. If I fail to pay for these services, accruing charges shall constitute a valid mechanic’s lien on the vessel to secure payment and I expressly waive all rights under NJ state law. If collection is made by suit or other method, I agree to pay all interest, collection cost and reasonable attorney fees until the balance is paid in full. FHYW is not responsible for any loss or damage to the vessel or its contents due to fire, theft, vandalism, wind, snow, ice, severe weather, or any other cause beyond their control. My signature also acknowledges reading and understanding the costs of these services (without an estimate) and the terms stated above.
