

WaveJet V2.5

Inkjet Printing System for Coated Stocks, Plastics & Foils

Featuring
VersaDrop™
Technology

The new 2.5 inch print head. Two heads for a total of 5 inches of print.

Print crisp, dark and professional looking images on a wide variety of stock.

WaveJet V2.5- Kirk-Rudy's new larger 2.5 inch print head featuring VersaDrop™ technology which offers greater functionality by modulating ink drop size. The result is sharper text with the crisp edge definition required to produce Grayscale images with vibrance and clarity all without sacrificing production speed and print quality.

Combine this innovative technology with the WaveJet V2.5 versatility in supporting multiple fluid types and the result is the capability to create those eye-catching ads your customers request on a wider variety of substrates! Built-in reliability and ease of use make WaveJet V2.5 well suited for all production environments.

Robust inkjet technology coupled with Kirk-Rudy's product handling systems make for one of the most versatile printing systems on the market. When you're ready to expand your operations' capabilities, you're ready for the Wavejet V2.5 Printing System.

KRWaveJetV2.5 Inkjet Printing System
