JANUARY 2017

Dutchess County New York

Millerton Fire Company, Inc

REFLECTIVE ADDRESS MARKERS

Q: Do you know what one of the best things you can do ahead of time to help fire and emergency medical crews if needed at your home?

A: By having your home address properly posted in a visible location near the road!

The Millerton Fire Company has recently decided to offer a way in which you can do that by selling reflective address signs!

The details can be found with the photo; stop by the fire house on a Monday. Mail in forms to order can be found at local businesses and village offices! If you have any questions or need an order form, please feel free to message us on Facebook!

Protect Water Meters and Pipes from Freezing Temperatures

When outdoor temperatures drop below freezing (32°Fahrenheit) and especially if temperatures fall below zero, you may need to take precautions to protect your water meter and the water pipes inside your home from freezing. Water pipes in basements, unheated crawl spaces and outside walls may be especially susceptible to freezing. Here are some tips to protect yourself against potentially costly plumbing issues.

Protect your water meter -- If your water meter is located in an unheated or minimally heated area such as a crawl space or garage, make sure it is properly covered or protected to keep it from freezing. The meter is your responsibility and you are liable for any damage to the meter.

Eliminate drafts -- Close crawl space vents and openings. Repair broken or cracked windows. Make sure basement doors close tightly.

Insulate pipes in unheated areas -- Wrapping electrical heat tape or insulation around pipes that run through crawl spaces, garages or unheated basements may help prevent freezing. It's important to remember that both hot and cold water pipes may freeze.

If you turn on the tap on a cold day and no water comes out, your pipes may have frozen. Before doing anything you may want to check with your neighbors to find out if they have water. If they are also without water, please call Village of Millerton Water Plant at 518-789-4756 to determine if a water main in your area is shut down for repair. This could be causing the water outage. If there is no repair work being done, or the neighbors have water, you may have a frozen pipe in your house or in the water service line under your yard.
