MINUTES

Dale reported the repairs on the reservoir should be finished this week. Boulden is starting to put the sand layer in, and will put in clay and compact it. The clay is at the project. The County did the hauling and this has saved the District a great deal of money. Doug is in town to supervise the filling and compaction of the clay. After a question about filling, Dale reported he could take all water from the creek except the 3cfs required by the State Fish & Game Commission.

RESERVOIR  
REPAIRS

Stan reported the haul road would not have to be rehabilitated. Dale reported a dam over pack creek would have to be rehabbed.

The metering of the irrigation system was discussed, and Gary feels the smaller meters might not cause a lot of clean-out problems. Dale stated he felt that prop meters should be put in, and screens are not as necessary. George stated he put a cleanout plug on his lawn meter with a valve upstream for easy cleanout. Dale reported he plans to put a good sized gravel pit under each meter. Dale is working on the specs for material specifications, and labor specifications. The specifications should be ready to advertise within the week.
