TO OUR CUSTOMERS, THE SPORTING GOODS DEALER AND JOBBER:

We firmly believe that the Sporting Goods Dealer of the United States serves the most discriminating clientel in the world, and with this belief in mind, we have strived and are striving to supply you with a complete line of the finest archery tackle that can possibly be produced and assembled for distribution anywhere.

Our bows have a history of many years of research and design by some of the best known technicians of our times. They have not been manufactured merely as another item to be produced and sold, but are the fruits of the skill of these technicians; the careful design to achieve the ultimate; the rigid specifications of tested prime materials combined with the skill of the bower's art to achieve a bow that will give the ultimate in cast and in smoothness, in speed and in impact, a bow that is truly a jewel among bows. We are proud of the results, and grateful to the sportsmen for their ever increasing demand for Black Hawk products — a demand that has indeed forced us to expand our production facilities many times in the past years, in order that we can better serve these demands.

We have found through exhaustive research, that a bow properly designed and properly balanced must, in order to achieve perfection, be produced by a combination of materials that, fortunately for the archers sake, have been made available in the last few years by the rapid technological advances in the field of laminates and resins, and skillful design and craftsmanship. We use only the highest quality of selected hardwoods, high elevation maple, osage, walnuts and other semi-precious woods in our bows, carefully cut and tapered in our own shops, under skillful supervision, combined with carefully made and selected glass backing and facing, and welded with the finest resins available.

In the following pages, you will find listed and pictured the finest equipment available for your display and sales to your customers, carefully manufactured Black Hawk equipment, that has undergone the rigid tests that our bows have, each item a gem in its own field—Black Hawk Arrows, Black Hawk Accessories, Black Hawk Aluminum (that has swept the country), Targets, Nocks and Points, Black Hawk Strings, and many other items manufactured by us, also the finest leather goods available, combined with accessories, in short a complete line of archery equipment that will eliminate all your headaches. You can fully stock your shop from one source, with the gratifying knowledge that you have the best for your customers, and best for yourself.

CRAVOTTA BROTHERS, INC.

BLACK HAWK® BOWS THE BLACK HAWK® WARRIOR

BLACK HAWK® WARRIOR is guaranteed for one year and is constructed of the same materials as the Chief; has an offset forward type handle or riser. It is an ideal bow for target, field or hunting, and will accommodate arrows up to 28"; the length of bow is 5'1", and weights from 30 to 65 pounds at 28" draw.

The Black Hawk Warrior—BHW52 List Price \$52.00
 Any Bow Ordered Over 65#—Add \$1.00 per Pound to List Price.
 Left Hand Bows Made To Order—Allow 60 Days for Delivery.

THE BLACK HAWK® WASP

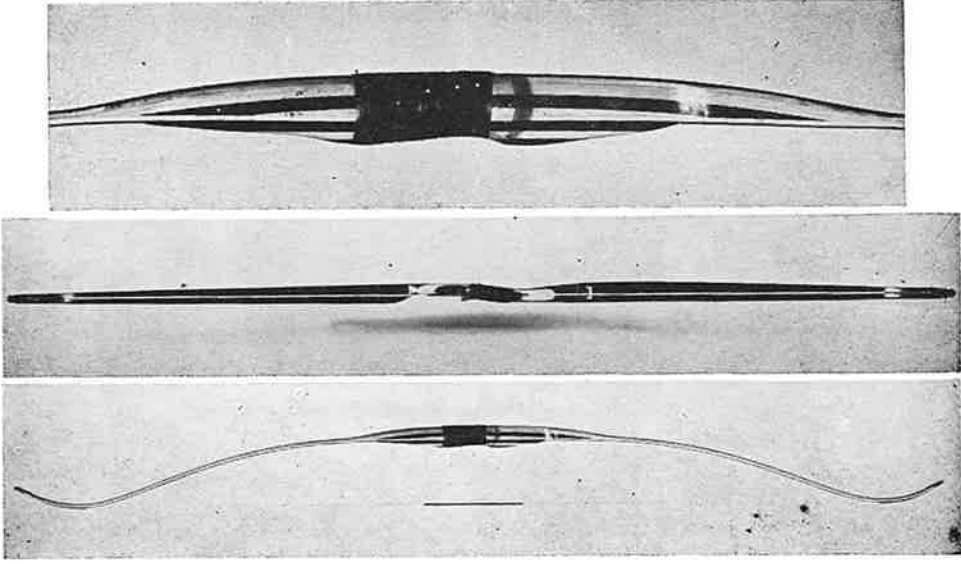

This bow is guaranteed for one year. Bows are available in two lengths: 62" and 58 1/2" unbraced; braced, the lengths are, respectively, 4'11" and 4'7". Bows are made in weights from 25 lb. to 65 lb. at 28" draws.

The Black Hawk Wasp—BHW48, either length List Price \$48.00
 Any Bow Ordered Over 65#—Add \$1.00 per Pound to List Price.
 Left Hand Bows Made To Order—Allow 60 Days for Delivery.

NOTICE — WHEREVER POSSIBLE, ORDER BY STOCK NUMBER.

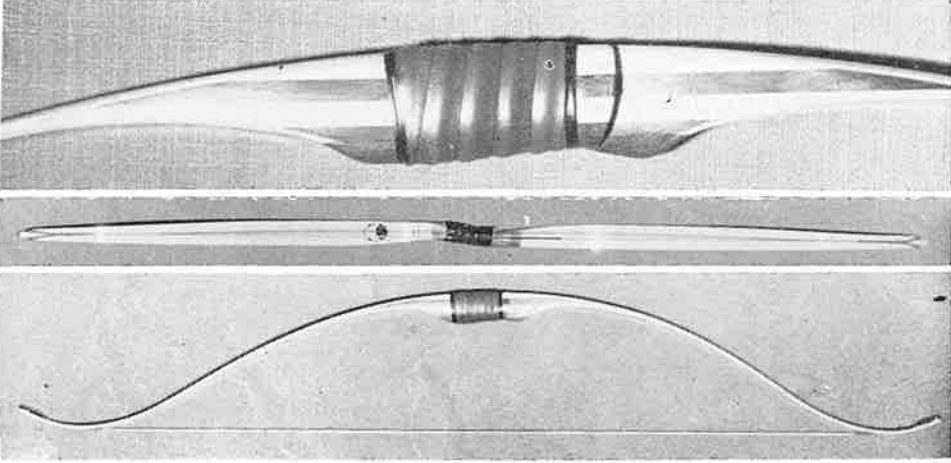

BLACK HAWK® BOWS THE BLACK HAWK® CHIEF

THE BLACK HAWK CHIEF BOW is designed primarily for target shooting; it is also excellent for field and hunting. The speed and trajectory is amazing; the material and workmanship are of the finest. The composition of this bow consists of glass backing and facing, maple cores and two-tone handles or risers made of maple and walnut wrapped with a beautiful leather grip. The bow is guaranteed for one year. The bows come in one length 5'8" and weights from 30 to 60 pounds at 28" draw.

The Black Hawk Chief—BHC65 List Price \$65.00
 Any Bow Ordered Over 60#—Add \$1.00 per Pound to List Price.
 Left Hand Bows Made To Order—Allow 60 Days for Delivery.

THE BLACK HAWK® HORNET

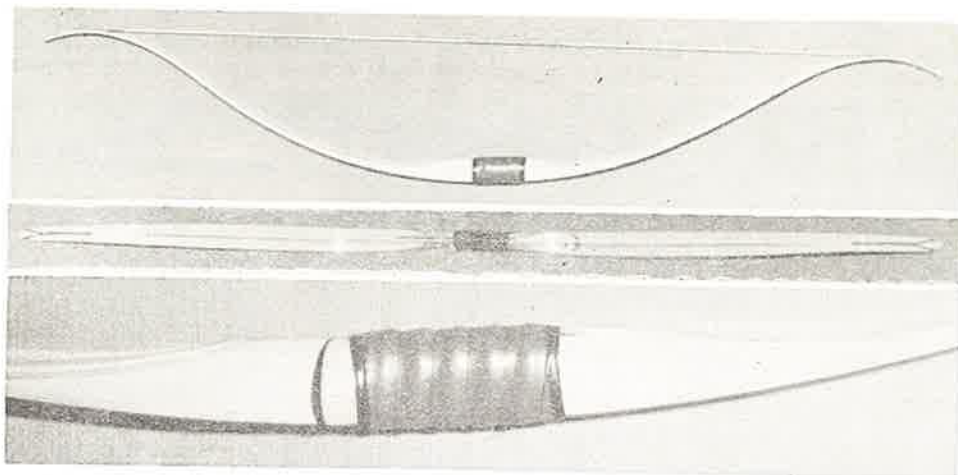

This bow is guaranteed for one year. Bows are available in two lengths: 62" and 58 1/2" unbraced; braced, the lengths are, respectively, 4'11" and 4'7". Bows are made in weights from 30 lb. to 70 lb. at 28" draws.

The Black Hawk Hornet—BHH56, either length List Price \$56.00
 Any Bow Ordered Over 70#—Add \$1.00 per Pound to List Price.
 Left Hand Bows Made To Order—Allow 60 Days for Delivery.

NOTICE — WHEREVER POSSIBLE, ORDER BY STOCK NUMBER.

BLACK HAWK® BOWS

THE BLACK HAWK® BEE

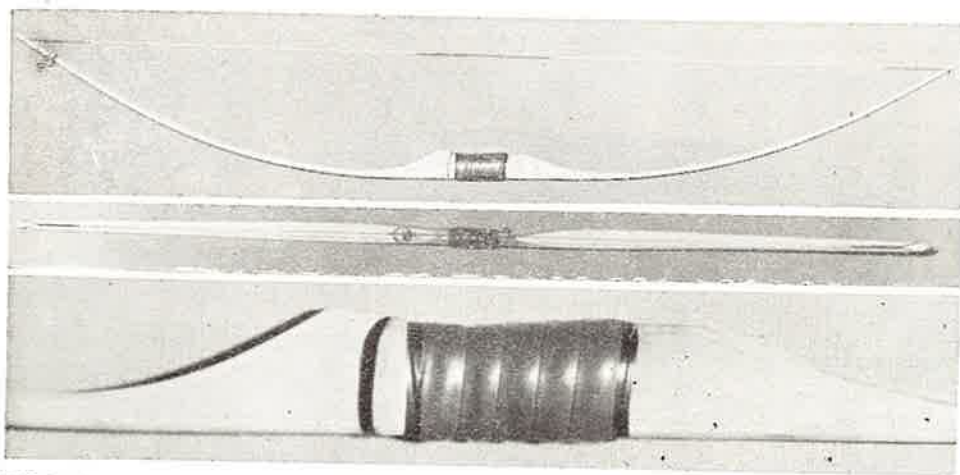

This bow is guaranteed for one year. Bows are available in two lengths: 62" and 58½" unbraced; braced, the lengths are, respectively, 4'11" and 4'7". Bows are made in weights from 25 lb. to 60 lb. at 28" draws.

The Black Hawk Bee—BHB36, either length List Price **\$36.00**

Any Bow Ordered Over 60#—Add \$1.00 per Pound to List Price.

Left Hand Bows Made To Order—Allow 60 Days for Delivery.

THE BLACK HAWK® YELLOW JACKET

THE BLACK HAWK YELLOW JACKET BOW is a straight limb bow, designed for target, field and hunting; is very rugged and fast. It consists of glass backing, hickory, maple and composition facing. The length of bow is 5'6" and bow weights are from 30 to 60 pounds at 28" draw.

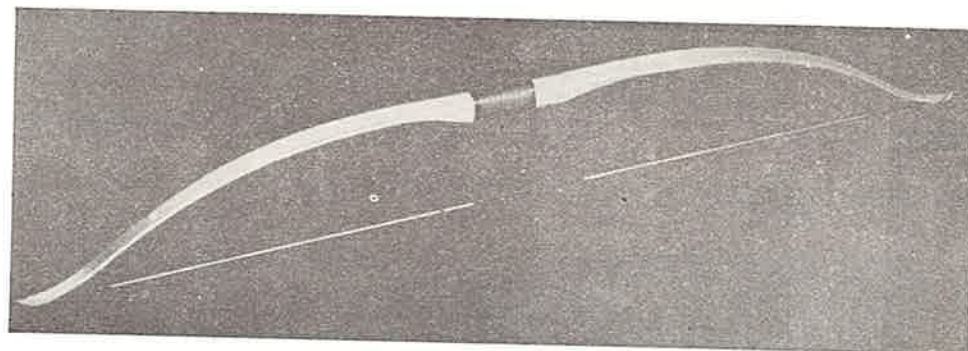

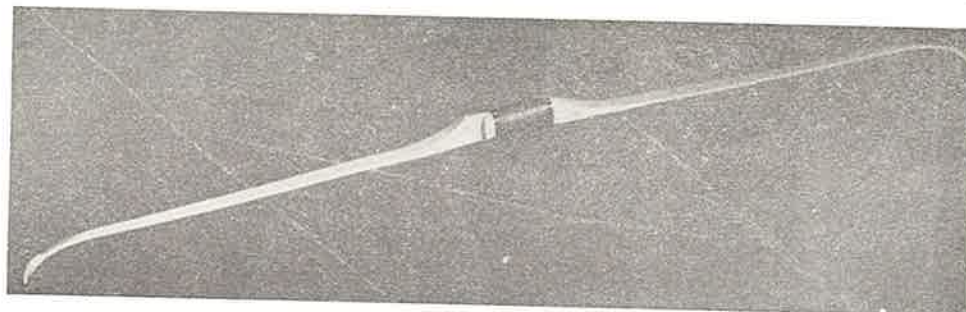

THE Black Hawk Yellow Jacket—BHYJ24 List Price **\$23.95**

Any Bow Ordered Over 60#—Add \$1.00 per Pound to List Price.

Left Hand Bows Made To Order—Allow 60 Days for Delivery.

BLACK HAWK® BOWS

THE BLACK HAWK® SCORPION

The Black Hawk® Scorpion is a bow designed for the ladies and the youngsters who do not draw over 26". The backing consists of fiberglass, and the rest of the bow is made of the finest materials used in the making of composite bows. The bow nocks are made of nylon and the string is of dacron. The weights of this bow range from 15 to 40 lbs.; the length of the bow unbraced, is 58" from tip to tip.

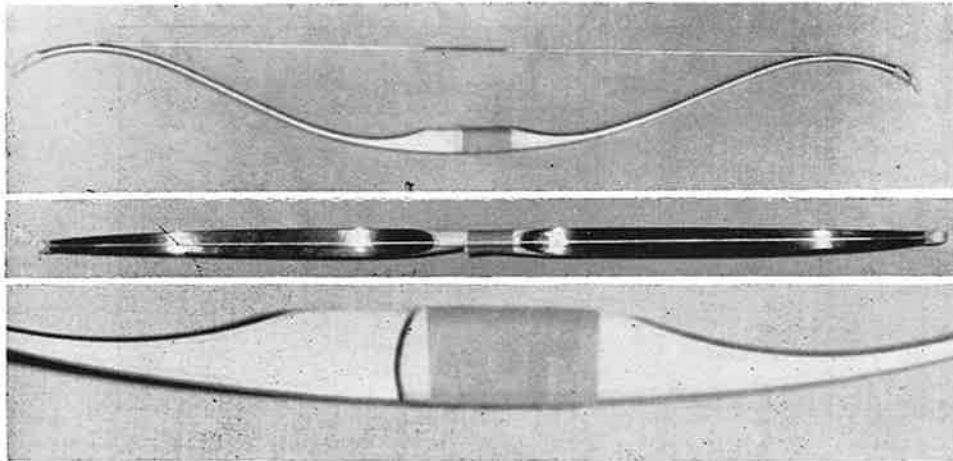

The Black Hawk Scorpion—BHS19 List Price **\$18.95**

Any Bow Ordered Over 40#—Add \$1.00 per Pound to List Price.

Left Hand Bows Made To Order—Allow 60 Days for Delivery.

BLACK HAWK® BOWS

THE BLACK HAWK® MOSQUITO

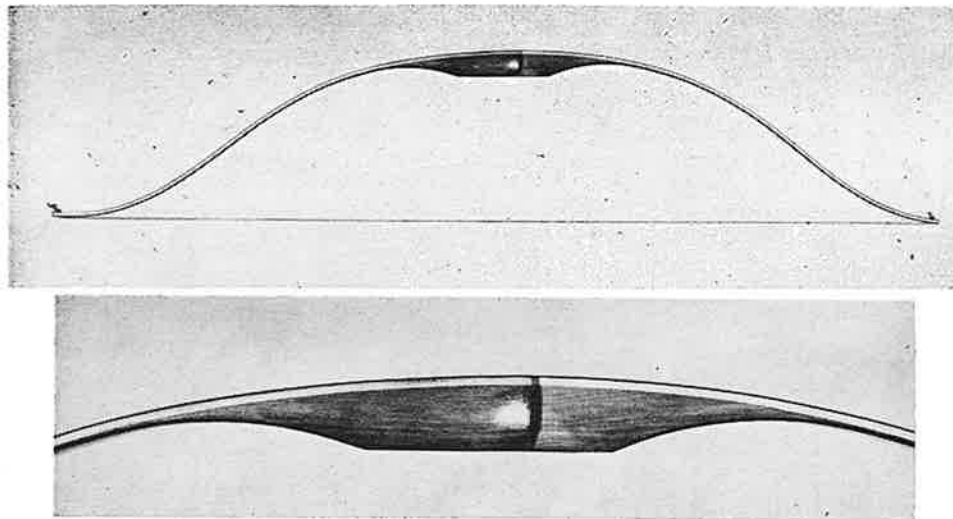

THE BLACK HAWK MOSQUITO is a bow designed for the youngster who wants a bow that looks and shoots like Daddy's bow. As far as we know, we believe that this is the only kid's working recurve bow being made commercially to sell at this amazing, low price. The bow consisting of backing, hickory, maple and composition facing, nylon bow nocks, and dacron string, weighs from 15 to 35 pounds at 25" draw. Bow comes packaged two to the carton.

The Black Hawk Mosquito—BHM11 List Price **\$10.95**

Left Hand Bows Made To Order—Allow 60 Days for Delivery.

THE BLACK HAWK® FLEA

THE BLACK HAWK FLEA BOW is a bow designed for the kiddies from three to ten years old, it is similar to the Mosquito except it is lighter in weight and it comes with a linen or hemp string, has no bow nocks and no wrappings on the handle. The bow is practically indestructible; comes packaged two to a carton, no weights specified.

The Black Hawk Flea—BHF9 List Price **\$8.95**

Left Hand Bows Made To Order—Allow 60 Days for Delivery.

BLACK HAWK® ARM GUARDS

320B—\$3.00

Large, extra width hunting guard with one-inch wide steel stay and three leather straps and buckles to fit over large arm area.

320—\$2.75

Same as 320B, except having elastic bands instead of leather straps.

310—\$2.00

Full length, wide, with one-inch stay for full protection.

300—\$1.50

Semi-narrow, tapered design provides coolness, yet ample protection.

301—\$1.25

Same as 300, but made of Kip leather, not Cordovan.

305—\$1.35

Full length guard, but with extremely narrow design.

300S—\$1.35

"Shorty," only 4¾" long. Favorite with many archers.

300K—75c

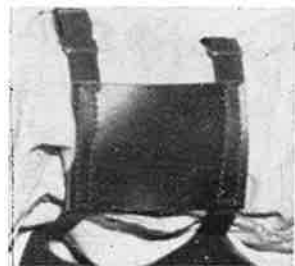

Leather guard with Arrabuk lining. Elastic band with hook.

350—50c

Split grain leather for the kids. With adjustable snap fastener.

360U—\$1.00

Upper Arm Guard—A new item for men archers. To be used on the biceps when wearing a blousy shirt or jacket. Made of the finest material.

BLACK HAWK® GLOVES

510K—\$1.25

Leather back with open Cowhide tips.

510—\$1.65

Leather back with open Cordovan tips.

520—\$2.00

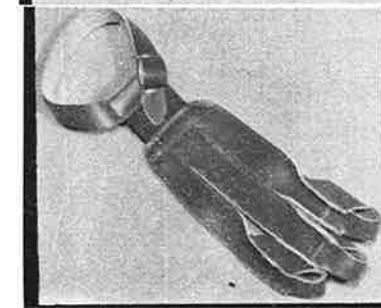

Open Cordovan tips, elastic insert back.

530—\$2.25

Closed-end styled with Cordovan tips. Elastic insert keeps glove back smooth, and finger stalls snug. Relieves wrist-strap tension.

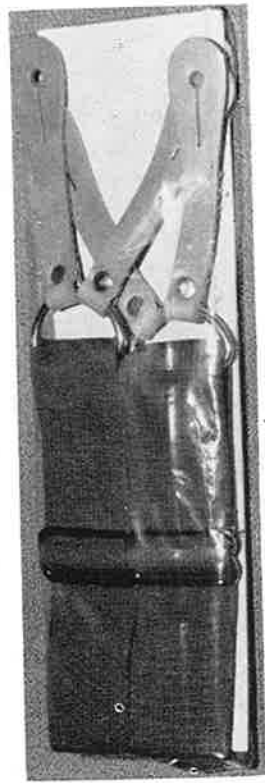

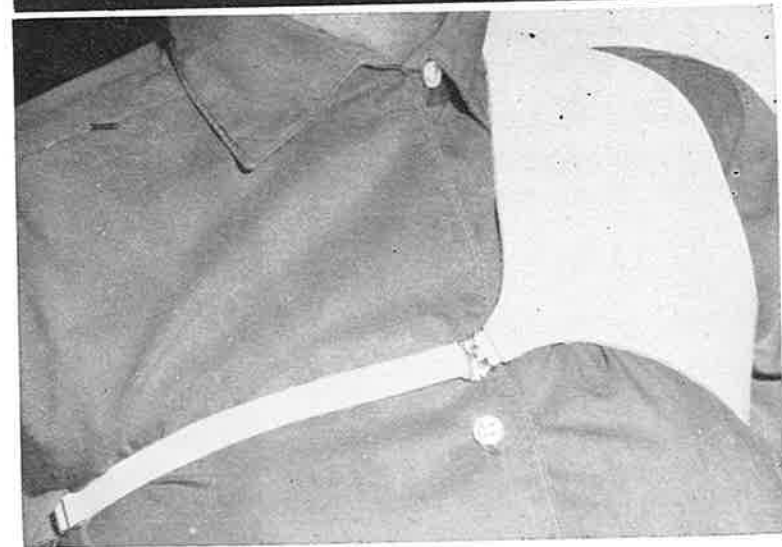

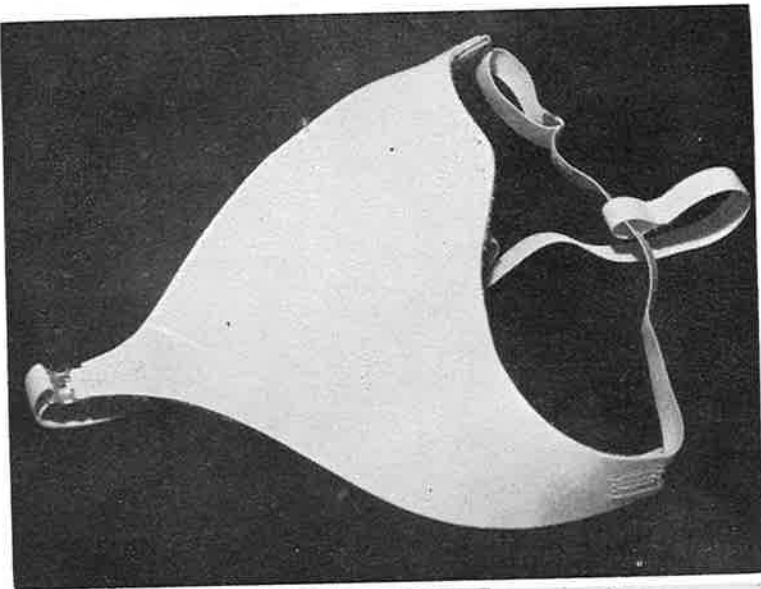

530K—\$2.00

Same specifications at 530, except tips are made of cowhide.

GLOVE SIZES: Men: small, medium, large and extra large. Ladies: medium and large only.

ARROWS

Aluminum Illustrated

Our aluminum is made from an alloy that has been developed specifically for arrows. From this alloy, we then process the aluminum to the highest standards and tolerances that are required for the manufacture of high-grade aluminum arrows. The Black Hawk Aluminum Arrows are in such demand, that at times we are many weeks behind on this fine product. They are used by the most discriminating archers and this alone proves, that the qualities are of the best. The workmanship and material used in this product are the finest available.

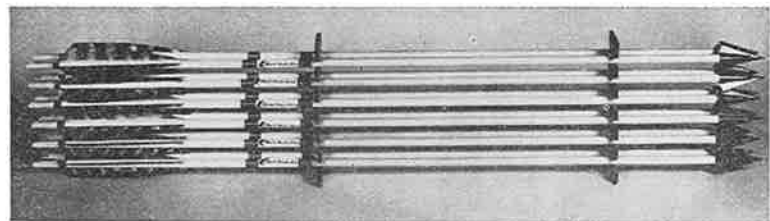

No. 1 BLACK HAWK ARROWS in 26" — 27" — 28" Lengths

Custom grade arrows are made from the finest materials that we can purchase. They are closely matched in weight and spine and are beautifully colored and crested. Please specify Bow weight and length of arrow. All arrows are packed 1 dozen to a box.

BLACK HAWK® WATERPROOFING

FOR ARROWS AND FLIES

Does Not Stiffen Feathers

Directions: Apply Waterproofing to the fletching or fly with applicator. Let dry for a few minutes and arrow or fly is ready to use.

Contents: One Fluid Ounce

Packed 12 to a Case, 50c Each

List Price, \$6.00 a Case

THE BLACK HAWK® PLASTIC VEIN

This Vein is not designed to take the place of feathers, but is a vein of plastic and many thousands of target archers love to shoot arrows with a plastic vein. Once they learn to shoot with a plastic vein, they can always increase their score from 10 to 35%. The demand for this item will greatly increase. Colors: Red, white, yellow and green.

List Price of 2" Vein 3c each

List Price of 2 3/4" Vein 3c each

List Price of 3 1/4" Vein 4c each

BLACK HAWK® TAPERING TOOL

This tapering tool will fit 99% of all points and nocks made, also included are four bushings. The bushings have tapered sleeves which fit in a tapered hole and when pressed into the main body firmly they will fit snugly. The sizes of these bushings are 1/4", 9/32", 5/16", and 11/32". All these bushings are oversize to permit clearance of oversize shafts and also for shafts that are painted. To use this tool insert the bushing that corresponds to the shaft size and rotate the shaft clockwise until the tool stops cutting. Your job is then complete.

The blades that are used in this tool are regular injector type blades similar to Schick or other type injector razors. They can be purchased practically at any drug store in the country, costing around 10c a piece. You do not have to buy special made blades at 50c or more per blade. The plastics that are used in this tool are of a very high standard and if the tool is used properly, it should give you many years of trouble-free service.

Black Hawk Tapering Tool—BHHT4 List Price **\$3.50**

BLACK HAWK® ADJUSTABLE BOW SIGHT

Kit consists of Black Hawk® Adjustable Bow Sight and two extra apertures. To adjust this sight loosen the thumb screw. You can move the body of the sight up and down for elevation and the apertures in and out for windage. The position on your sight can then be marked for permanent sighting records.

Black Hawk Adjustable Bow Sight—BHBS2 List Price **\$1.75** each

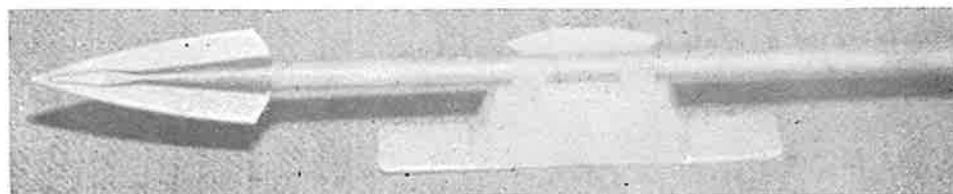

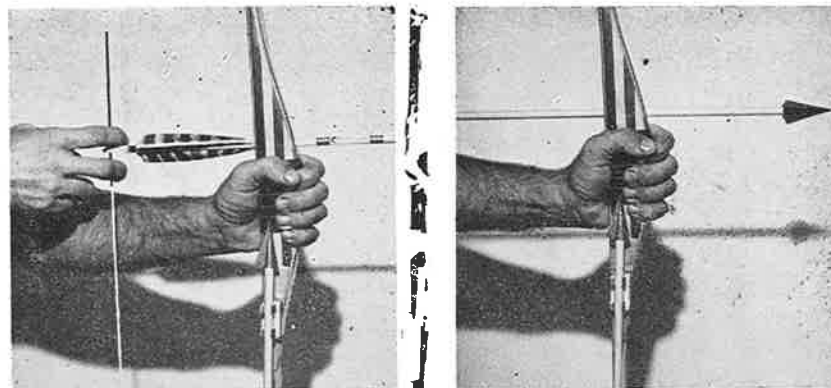

THE BLACK HAWK® BOW NOCK

THE BLACK HAWK BOW NOCK is made from nylon and is practically indestructible. It is used by the amateur bow maker, and also for repairing old bows. The illustration is approximately two times larger than the actual nock. The hole size is 1/2"x3/16"x1" deep. List Price, per Pair, **\$1.00**.

👉 NOTICE — WHEREVER POSSIBLE, ORDER BY STOCK NUMBER. 👈

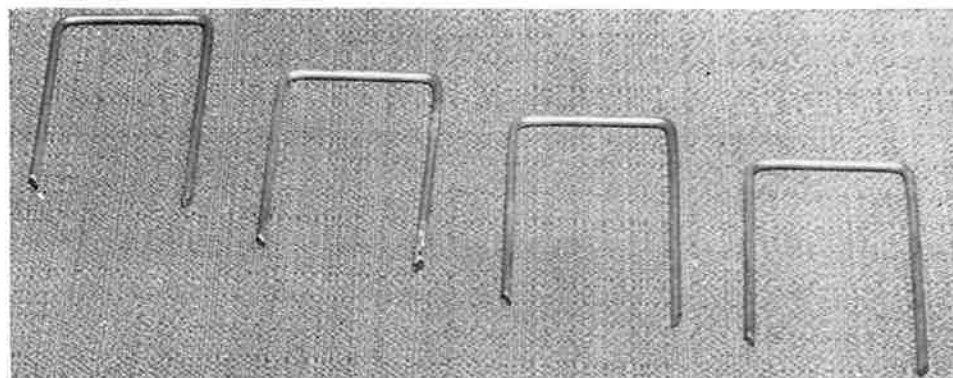

THE BLACK HAWK® BOW QUIVER

THE BLACK HAWK BOW QUIVER is without a doubt the lowest priced quiver on the market. It was tested and proved for two hunting seasons. It is an article that no archer-hunter would be without once he sees it. The purpose of this quiver is to have an arrow at archer's hand the moment he releases his first arrow with the minimum amount of movement for the second shot, which is very important in archery hunting. This quiver does not eliminate the need for a back or shoulder quiver, but the purpose is to give the archer the second arrow quickly and silently, when needed in a hurry. The instructions for applying this quiver are very simple—all that is needed is adhesive or friction tape, and in a few seconds the quiver is attached to the bow in the position the archer may want it, either back or side of bow, as illustrated. (Note: Below archer's hand.)

Black Hawk Bow Quiver—BHBQ1 List Price, **\$1.00** Each

BLACK HAWK® TARGET STAPLES

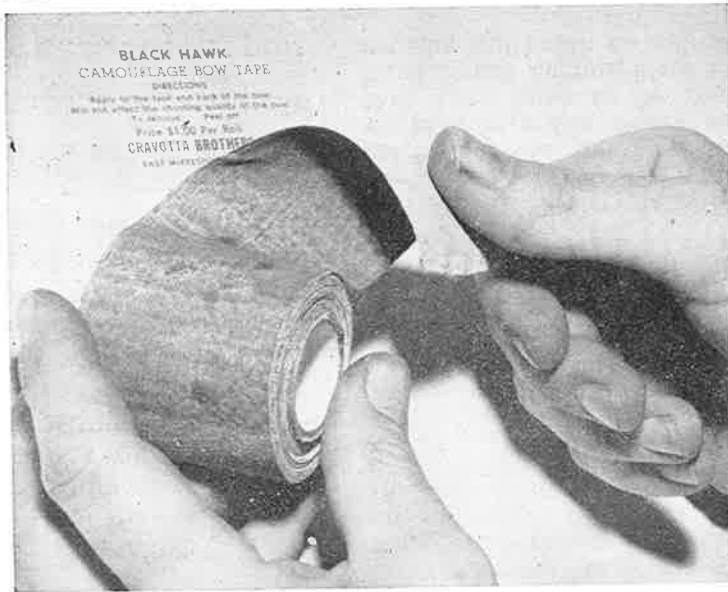

Black Hawk Target Staples are used to fasten targets to straw targets or bales of hay. Packed 4 to a set.

Black Hawk Target Staples—STAP List Price, **35c** per Set

BLACK HAWK® CAMOUFLAGE BOW TAPE

DIRECTIONS

Black Hawk® Camouflage Bow Tape is a cloth with a pressure type adhesive which can be easily removed when not needed on bow. It will not affect the cast of the bow and the color is an olive green speckled with blemishes, and makes the bow blend very well with the forest and fields. This is an item wanted by all archer hunters. There is sufficient tape in one roll to cover any bow up to six foot in length.

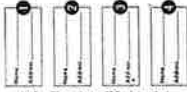

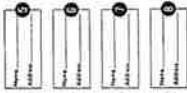

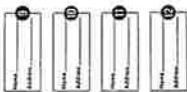

DIRECTIONS—Remove tape from roll and apply longitudinally along the length of the bow and fold tape over where bow tapers. Can be applied to the back and front of the bow if so desired or on one side only.

To remove — Peel off!

Black Hawk Camouflage Bow Tape—CATA List Price **\$1.00**

Black Hawk® Nocking Point 25c Each

This device is made of a tough, durable plastic. It is almost impossible to wear it out. It has been used in several tests and shot thousands of times without showing signs of wear.

The purpose of this nocking device is to give the archer a permanent nocking position on his bow. The nocking position on the bow is one of the most important fundamentals for good shooting. This question is often asked by new archers: Where should you nock an arrow? This device

is the answer for simplifying and maintaining the proper location for a permanent nocking point. If used properly it should increase your score 25% in field and target shooting. For hunting it is indispensable, as it will eliminate the possibility of the arrow slipping away from the proper nocking position. Directions for applying this nocking point are simple, as shown in sketches below.

When applying this device to a new string, be sure that the string has reached its maximum stretch. This can be accomplished by bracing the bow and shooting it a few dozen times (on an old string this not necessary). Then locate the exact position that you nock your arrow, which is normally 1/8" above arrow plate. Mark this spot with a pencil and then set the nocking point on the string, with the mark in the center of the cup. Wrap the legs of the nocking device with dental floss or good, strong thread, making sure it is secure. When the device is put on properly, in a shooting position, the cup should be pointed toward you. If it is at a slight angle it will not affect your shooting.

If the nocks are slightly large and fit snugly, or slightly small and fit loosely, this will not affect your shooting. Your bow is now ready to shoot, as for the nocking position being right.

May we wish you good luck and an improved score.

Pat. No. 2,617,402

- Does not interfere with bracing or unbracing.
- Does not interfere with cast or accuracy.
- Light weight — manufactured of special formulated rubber.
- Lengthens string life.
- Universal size—Fits all bows.
- Acclaimed by bow hunters everywhere.

*The Purpose of
Brush Buttons*

DAMPENING ACTION — Whenever a highly stressed bow is shot the string vibrates producing a hum. Harmonics (over tones) travel the string and establish other frequencies that are of many pitches — the combined overall result is a buzzing noise which continues after the shot. In hunting this effect continues after release, allowing the game to pin point the hunter and in many cases the game has "jumped" the arrow (moved before the arrow got to it). You cannot eliminate the original "crack", or noise of the string cutting through the air, as it propels the arrow, nor is it necessary as in the woods any number of things produce a sharp noise; acorns dropping, dead limbs falling, etc. This noise is not especially frightening to deer and other game, but the after effect of humming has no match in nature. Brush Buttons mounted on the string dampen this after effect especially the higher frequency, because they must be moved in the frequency of the string for it to continue to hum.

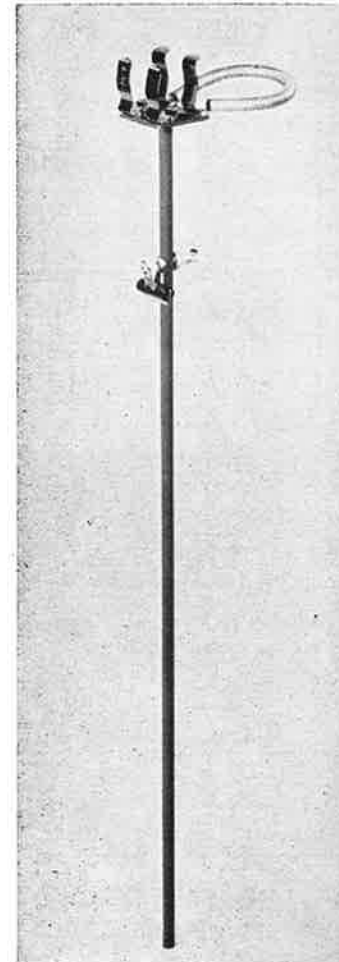

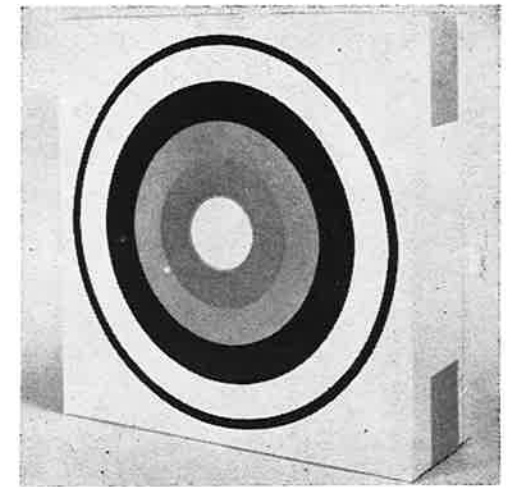

BRUSH PROOFING ACTION—When afield brush, grass, berry stems, etc., catch between the bow and string working into the wedge so tightly, that they have to be removed by hand. Brush Buttons block this wedge causing the brush to deflect out.

**BLACK HAWK®
ECONOMY TARGET**

The target is made from heavy corrugated paper. It can be assembled by opening the box and taping it. It is then packed tightly with shredded paper or straw. The four-color face is printed on the carton. A very economical target.

BLACK HAWK® CORRUGATED TARGET FACES

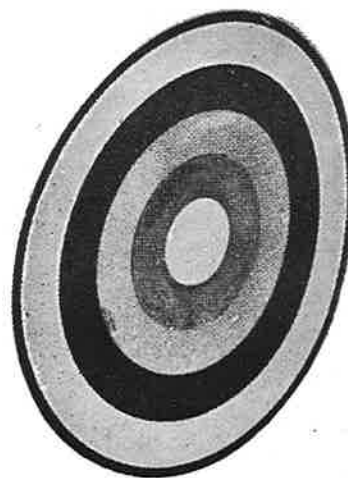

These Target Faces are made in accordance with the N.F.A.A. hand book for field shooting. They are made of heavy corrugated paper and the shooting spot is heavy black with the background in white. These targets will save a club many hours in preparing for a shoot. These targets will outlast most any target on the market because of their heavy construction. During rainy weather these targets can be waterproofed by immersing for a moment in moulten parrafine. The targets come in the following arrangements:
