

Forged High Pressure Ball Valves

SBVF360 Series

Introduction

- SUPERLOK SBVF360 Series ball valves provide quick quarter turn operation in a compact design providing positive shutoff in applications up to 6,000psig (413bar).
- A selection of valve body, seat, and seal materials provide a wide range of pressures and temperatures at which the valve may be used.

Features

- High flow capacity in a compact design
- Micro - finished ball provides a positive seal
- Low operating torques
- Positive handle stops
- Panel mountable
- Handle indicates flow direction
- Each and every valve is tested at the factory

Specifications

Pressure rating	6000psig (413bar)@70°F (21°C) with standard PCTFE seat
Temperature rating	-65 to 350 °F (-54 to 177°C) with standard PCTFE seat
Body material	316 stainless steel and brass
Body configurations	Two - way and Three - way
Port connections	1/16" to 3/4" and 4mm to 16mm Variety of end connection.

Testing

- Each Valve is tested with nitrogen at 1000psig (69bar) to maximum allowable leak rate of 0.1 SCCM.
- Hydrostatic shell test is performed at 1.5 times of the working pressure. (OPTION)
