

Roof Application

For use on new or used Recreational Vehicles, Buses, Trailers, Commercial Vehicles, and Ambulances.

Introducing a way to improve your vehicle's roof insulation by an increase of R13+ at only 40 mills thick*.

Not only does it increase the R value but Delta T Automotive is durable to help protect against tree branches and other debris that may hit or fall on your roof.

Seals and eliminates the need for annual maintenance.

Air conditioner will run more efficiently and less often.

Reduce condensation in ceiling on and around ducts.

It can be applied over existing roof.

Easy spray application.

Factory installed in Northern Indiana.

UV stable, reflective, and no VOC's.

* Delta T Automotive at 40 mills was tested by an independent lab against R-13 fiberglass insulation and out performed it. Reduced interior temperature of vehicle pictured by 15+ degrees.
