

It's Chemistry

It's chemistry when you fall in love.
It's chemistry; it's chemistry.
It's chemistry when the moon's up above.
It's chemistry; it's chemistry.

And, everything that you perceive
Hear, feel, taste, smell or see
Is chemistry in the brain
Or of the heart.

It's chemistry when you cry a tear.
It's chemistry; it's chemistry.
It's chemistry when you feel fear.
Well possibly; it's chemistry.

Elemental biology,
Simple anatomy.
Can't you see?
It's obviously chemistry.

It's chemistry when you fall in love.
It's chemistry; it's chemistry.
It's chemistry when the moon's up above.
It's chemistry; it's chemistry.
It's chemistry isn't it clear?
It's chemistry; it's chemistry.
It's chemistry that we're even here.
It's chemistry, my dear.

And, everything that you perceive
Hear, feel, taste, smell or see
It's chemistry; it's chemistry.
It's chemistry; it's chemistry.

And, you and me got chemistry.
Chemistry, chemistry.
