--	--	---

Benefits of Treatment: Healthy Gut and Optimal Results from other Treatments at the Clinic.

Process of Treatment: The Steps of *CHRONIX* Treatment are:

- 1) Administer Food Sensitivity Test to determine Inflammatory Triggers
  - Draw blood and send specimen to Biotrinetix Lab
- 2) Review test results with Dr. Blum from Biotrinetix Lab over the phone
  - Agreement of treatment protocol; Ordering provider can set forth goals for Dr. Blum to achieve with patient
- 3) Get Patient their results
  - Follow-up visit with patient to give hard copy of test results and remind patient of included compliance counseling with Dr. Blum from Biotrinetix
- 4) Dr. Blum contacts Patient for initial review of results
  - Notes will be sent to you via HIPPA portal from Dr. Blum at Biotrinetix Lab
- 5) Dr. Blum sets Patient Nutritional Counseling Schedule: Weekly Compliance Calls ensures patient compliance; 120 days or as needed
  - Receive ongoing patient notes from each weekly consult between Dr. Blum and your patient
- 6) Dr. Blum may recommend certain protocols to you to consider for the patient (Liver Detox, Intestinal Permeability, etc)
  - Continuous engagement and communication between you, Dr. Blum, and patient to achieve optimal compliance
- 7) Clinic completes script if necessary and as appropriate for any additional protocol
- 8) Lab Test-Managed as appropriate

Note: We coined the term *Chronix* and define it as the crux of all chronic inflammatory conditions pertaining to a wide range of disciplines such as pain management, autoimmune disorders, diabetes, insulin resistance, digestive disorders.
