

Lubricare 2

fast, effective, and cost-savings
maintenance

Lubricare 2 automatically performs maintenance (cleaning and lubrication) of dental handpieces, which are essential for daily practice. Thanks to different preprogrammed operating modes suitable for each specific handpiece, Lubricare 2 can automatically perform maintenance of up to four handpieces in a short time. The clean air-blow system ensures cleaning and lubrication of the inside of the handpiece thoroughly and allows constantly for repeatable high standards without intra-operator variability, which may occur during manual lubrication.

NEW Lubricare 2

>>> Up to four handpieces
in a short time

 **ONLY 20 SEC.**

Thanks to different preprogrammed operating modes suitable for each specific handpiece, Lubricare 2 can automatically perform maintenance of up to four handpieces in a short time. It cleans a turbine in approximately 20 seconds and a contra-angle in 40 seconds.

>>> Cost-saving

**4X LESS OIL
CONSUMPTION**

When using Lubricare 2, oil consumption is reduced by 4 times compared to manual procedure, thus allowing for a faster maintenance with excellent cost savings.

>>> Clean Airblow System

By employing the dual solenoid valves system and a clean air dedicated conduit, the system can supply clean air without a mix of oil. During the water removal process before lubrication, the system removes the water in the head, which maximizes lubrication results and minimizes any idling period before use.

fast, eff
and cost-
mainten

Effective,
time-savings
maintenance

>>> Easy maintenance

The control panel is flat for easy cleaning, and the front door can be removed for improved access. Lubricare 2 incorporates a built-in oil mist suction mechanism to prevent aerosol diffusion when in use.

>>> Spraynet[®], its best companion

**99.99 %
REDUCTION
OF THE MICROBIAL LOAD**

To achieve the best outcomes, Bien-Air highly recommends using Spraynet[®], which is proven to reduce 99,99% of the microbial load.

>>> Full compatibility

Lubricare 2 is compatible with handpieces and cleaning or lubrication products from other manufacturers. Additional couplings or spray holder may be needed.

SPRAYNET® 99.99 % reduction in the microbial load

Bien-Air has always prioritized patient safety by developing products that protect against cross contamination as well as a range of maintenance products to ensure impeccable hygiene and unrivalled service life of Bien-Air handpieces.

With the COVID-19 Pandemic, Bien-Air's exclusive Spraynet® is now more important than ever.
