

In 2006, I was hit by a vehicle broadside while I was turning left into a business. For over 6 years, I went to 10 different specialists who kept passing me around, and drugging me to cover the problem. Finally, by the grace of God, I was referred to Dr. Sanders and he discovered my problem within 10 minutes in his office.... I woke up nearly every day feeling seasick and Dr. Sanders discovered that it was chronic migraines causing my sickness. For anyone who is involved in a vehicle accident and discovers illness as a result, go see Dr. Sanders right away. He genuinely cares about his patients and their health. Dr. Sanders gave me my life back!!!
