

BRIEFLY IN BUSINESS

Lansing's ADC achieves certification

ADC, the Lansing-based maker of scientific instruments and components, has achieved the International Organization for Standardization 9001 certification for its design, manufacturing and assembly integration.

The certification signifies that the company has processes and procedures to meet and exceed customers' requirements through continuous improvement.

To qualify for ISO 9001 certification, eight principles were met: customer focus, design and manufacturing, assembly and testing,

involvement of people at all levels, process approach, a system approach to management, continual improvement, a factual approach to decision making and mutual beneficial supplier relationships.

Founded in 1995, ADC has had 18 consecutive years of business growth and profitability with more than 500 customers in industry, academia and government.
