

# 2021 EQUINOX RAPTURE ZONE

The purpose of this illustration is to depict the alternative day-count of when the Jewish Year actually starts. The year used is 2021. This is considering primarily the Religious Year that YHVH instructed Moses to use starting with the Exodus. That month would be corresponding to Nissan or the 1st month from that point forward. However, the Rabbinical Calendar has taken authority over this Biblical notion and has interjected that the 7th month, that of Tishrei is the 'head' of the Civil Year or as Rosh HaShanah, and from where the years are counted from. The issue and problem is that using the traditional Rabbinical Calendar counts will have the Spring and Fall Feasts of YHVH not in their proper order. At times, the Feasts will occur before Spring and Fall. What the alternative calendar count suggests is that the fixed astronomical time boundaries are the Spring and Fall Equinoxes. These determine the 'time' within the year and from where the New Month and Year would start in the Spring for example. Many ancient civilizations synchronized their planting seasons and yearly feasts to the Equinoxes for example. The formula for determining the correct start of the Jewish Year or that of YHVH, in this model is how one would count the 1st New Moon after the Spring Equinox. From that date and time, the Passover would then fall on the Full Moon date. And the subsequent yearly Feasts to follow could concur thereafter. This formula also is applied with the Fall Feasts of YHVH from the Fall Equinox in how the 1st New Moon would determine the Month of Tishrei. In this case, it would be the 7th Month, etc. Why this is presented is that if this be the case, perhaps it is a truer depiction of the timeline that is actually the correct one and therefore one can have a better assessment of prophecy and events to come.

**TRIBULATION PERIOD**  
 Start of the 1st year of a 7-year Sabbatical Cycle (5782-5789)  
 Based on a study entitled The Sign of the Son of Man, the calculation starts at Shemini Atzerets of 2022 or 5783-5790. To have Jesus' 2nd coming on Yom Teruah of September 11, 2029 exactly 2520 days, (1 Tishrei 5790).

**October 18, 2022 = 2520 Days = September 11, 2029**  
 From December 21, 2020 Grand Conjunction will be **666** days out

# 2021 ASTRONOMICAL RAPTURE ZONE

The purpose of this illustration is to map-out the year 2021 with the major Feasts of YHWH along with the main astronomical occurrences. It would appear that there are some unique alignments, conjunctions and eclipses to occur. Foremost, the timeline presented will seek to calculate what 'season' or timeframe will be best for 'Rapture Zone' in 2021. This is if the Rapture event will take place in 2021. This 'zone' will be predicated on the following assertions based on one's personal understanding, study and interpretation of the various key Rapture verses. The Rapture event has to occur prior to the advent or debut of the coming false AntiChrist Israel will accept, 'In his own Name'. The Rapture event does not 'immediately' start the Tribulation Period. There will probably be a gap of time that is undeterminable but could be between months if at the most 1 year before the Tribulation Period clock starts. The Tribulation Period is 7 Biblical Years of 360 days and will coincide to sync with Daniel's 70<sup>th</sup> Week of Years, yet to be completed. This 70<sup>th</sup> Week of Years might very well coincide off the cusp of the 70<sup>th</sup>-year anniversary of when Jerusalem was declared Israel's capital in January of 1950, making 2021 the 70<sup>th</sup> year completed. This study suggests that the Tribulation will have to start at the beginning of a Sabbatical Cycle. This is predicated on the notion of the Jubilee Year counts and that the next cycle to start begins in the year 2022. Thus, if the Tribulation Period were to start, the cycle of 2022-2029 would have to be 'it' or it would have to wait until 2030 to begin the next Sabbatical Cycle.
