

Process Technician

Purpose and Scope

The Process Technician's main purpose is to ensure the molding machine and auxiliary equipment are running to optimal standards.

Key Responsibilities

- Ensure that all facets (thermolator, dryer, material) for the production run are ready in good working order
- Ensure parts are free of defects before each part is sent to QC
- Ensure the machine is clean and tidy before the operator is called to the work cell
- Check to see if the tool was set up to our standards and that the molding log check list is adhered to
- Troubleshoot and solve moulding problems
- Assist in lean manufacturing and create better ways to eliminate set up time
- Help enforce 5-S within Dynamplas
- Demonstrate clean work ethics and lead by example

Skills and Knowledge

- Technical trade college or equivalent experience
- Good written and verbal communication skills
- Minimum 5 years of injection process experience
- Knowledge of Mould Design
- Ability to solve moulding problems
- Keen attention to detail

If you have the qualifications to meet the requirements of this position and would like to be considered, please forward your resume and a cover letter to hr@dynamplas.com .
