To insure affordable gatherings, please plan to pay the dinner fee when you attend the no-host bar portion of our program.

*Cancellation deadline is Friday, October 7th. **No shows will be billed!***

Meeting Location / Directions: Please see attachment

Fundamentals of Corrosion Control Design for Pipelines

Norm Moriber, P.E.

**Chief Corrosion Engineer, Pipeline Integrity Services,
The Mears Group**

The successful design of corrosion control for pipelines depends largely on collecting and organizing all available information about the pipeline and the environment along the right-of-way. This might seem to be simple and basic, but excessive comfort, especially among experienced designers, can result in serious difficulties. This presentation will address some of the fundamental practices that can increase chances of success and present some of the classic blunders that have occurred when something obvious was overlooked.

Norm Moriber, P.E. has worked in the field of corrosion control since 1973, the last ten years as Chief Corrosion Engineer, Pipeline Integrity Services, for the Mears Group. He is a graduate of the Massachusetts Institute of Technology and a Registered Corrosion Engineer in the State of California. A NACE member since 1980, he has served on the NACE Board of Directors and in the Western Area offices. Norm has authored the monthly *Corrosion Basics* column in Materials Performance since 2007, and prior to that *Tales from a Career in Corrosion Engineering*. He has been a member of the Materials Performance Editorial Advisory Board since 2001 and is now Technical Editor of the magazine.

Norm has received the 2011 Russell Brannon Award, a Distinguished Service Award, and the Western Area Stratfull and Engineer of the Year Awards.
