TURN BACK THE CLOCK NO "CUTTING SURGERY" FACELIFT

No Pain • One Treatment • 7-10 Days Down Time

Aging of the skin seems to pop up overnight. Suddenly, looking in a mirror is our least "like-to-do" routine. Loose over-eye skin, jowl and under chin sags, ugly brown spots, lines and deep wrinkles from sun damage, and loss of fat volume take away our youthful appearance, making us look older than we want to admit. A headline-making treatment is here to fight the ravages of time even if you are NOT a surgery person. Look years younger in 5-10 days with NO pain, ONE treatment, and NO going under the surgical knife.

Dr. Rahimi's amazing "No Cutting Surgery, One Treatment, 5-7 Days Downtime Facelift" offers an alternative to achieving a younger looking face without the side effects associated with a "cutting surgery" facelift such as bruising, hiding at home, and stressing over results. Now, achieving a youthful appearance has never been so stress-free and pinpoint accurate.

Why a "No Cutting Surgery" Facelift?

Dr. Rahimi: For years, when a person looked older than they would like, the only option was a "cutting surgery facelift" that involves scary invasive surgery, uncertain results, possible infection, months waiting for swelling and bruising to diminish and skin and underlying tissues to heal, and scars to hide. There is no getting around the aging process for anyone. Over the years in consultations with patients wanting a more youthful appearance, I focused on developing a "no cutting surgery facelift" that offers dynamic, but natural results without the painful and traumatic experience of invasive "cutting surgery." So, I perfected and trademarked a new facial restoration technique using a "no cutting surgery" approach I refer to as **Quadrfecta**. It achieves a more youthful appearance, no surgery risks, little downtime, and is done in one treatment. My "no cutting surgery facelift" produces remarkable results. The response has been overwhelming. Patients say I've changed their lives. I feel proud and blessed to make such a positive difference.

Dr. A. David Rahimi MD, certified by the American Board of Dermatology and American Board of Cosmetic surgery, leads the Los Angeles-based Forever Young team he founded. His practice specializes in minimally invasive procedures that look natural and heal fast. Dr. Rahimi is recognized for providing patients with discrete, personalized service that incorporates a philosophy of holistic care. Among his natural result procedures, Dr. Rahimi is known for his Tuliplift™ Facelift, a patented procedure safer, and more effective than a traditional facelift AND his age reversing treatment "Quadrfecta" - No Cutting/One Treatment/One Week Downtime Facelift that sets a new standard in achieving maximum anti-aging results. Treatments offered at Forever Young include Eyelid surgery, Fat Transfer, Brow Lift and Lipolysis, Chemical Peels, Coolsculpting, Dermal Fillers, Ultherapy and numerous others.
