JM Series

The JM series of wall mount is a low cost solution that fits most applications. The mount design allows for easy installation and can be used with security bolts (not included), to deter removal of the display. Designed for commercial use, the mounts can fit a variety of VESA patterns and are manufactured with high quality.

The 85 lb. weight capacity limit of these mounts work perfectly for most applications. These mounts are compatible with our ACC-214 adapter kit, which makes them capable of attaching to a display with a 400 x 400 VESA mounting pattern. To insure an accurate fit, refer to the user manual of your device for specifications.

CTM Series

The Continu.us line of universal wall mount brackets are designed for flat screen displays that weigh up to 55 lbs. These VESA compliant mounts fit 75x75, 100x100, 200x100 ,and 200x200 patterns. To insure an accurate fit, refer to the user manual of your device for specifications.

The unique integrated bubble level design ensures level positioning on the wall, allowing installation in a minutes with fewer tools. Designed with commercial use in mind, the security hardware kit included can be used to help prevent theft of expensive displays by requiring specialty tools to detach the bracket.

Medical Mounting Solutions

J Hook Wall Plate

Replace your current wall plate with the easy to install DTS200 - Wall Plate and the J Hook - JHIL100 or JHIL200.
