

January 2011 received 1st cochlear implant in right ear. October 2012 received 2nd cochlear implant in left ear. April 2013 having balance problem. Dr. Miyamoto tested and said "balance is gone". Referred me to balance clinic. Started balance therapy May 8, 2013 with Stephanie Ford. After 7 sessions I was able to regain much of my balance. I was able to go back to bowling with reasonable results. I am able to do most walking and negotiating without a cane. Still have problems at night and on uneven surfaces. But - Thanks for the help!
