LEGACY OF LIMESTONE

The Land of Limestone Exhibition is housed within StoneGate Arts & Education Center, 405 I St., Bedford.

The facility itself is the former Indiana Limestone Co. headquarters, a 1926 Bedford limestone building listed in the National and Indiana Registries of Historic Places.

The Land of Limestone Museum brings to life the people, events and history surrounding Lawrence County's famous natural resource, limestone.

Limestone has been quarried in this part of southern Indiana since the mid-19th century, and has been used to build and embellish America's most distinguished architectural landmarks.

More than 200 archival and architectural photographs, historical news accounts, official records and documents recreate the development of a rural 19th century Indiana county seat into a teeming industrial center for a growing America by the early 1900s.

Recent tour groups at the museum included participants in "A Ride Through History" motorcycle gathering and the 2015 Indiana Landmarks Heritage Society Tour and luncheon. Exhibit hours are 8 a.m.-4 p.m. Monday-Friday, and admission is free.
