Full Stack Developer

Financial Services Organization in Sioux Fall, South Dakota
Full Time position

Our client, a Fintech firm based in Sioux Falls, SD is looking for a **full stack developer** to join the engineering team. This firm is committed to coaching and mentoring junior developers to help them expand their skill set, do meaningful work and become fully integrated into the engineering team. A full stack role is a great way to gain experience with different layers of enterprise applications (front-end, back-end, DB, etc.).

Requirements:

- **Familiar with modern web dev** – Should have some level of knowledge of protocols, and standards like HTTP(S), CSS, SCSS, REST, JSON, DNS, session management, caching, and headers
- **Strong object-oriented development** – Must be able to develop healthy classes with good encapsulation, clean interfaces and good documentation
- **Source code management**
- **Clean code** – Must employ good development practices: i.e..SRP, DRY, DI, TDD, YAGNI,KISS, CI & CD
- **TDD** – we believe untested code is broken, so we love people who see the value of testing and are always thinking of how to deliver tests with new features
- **Agile development practices**

Preferred Skills:

- **Back-end/Systems development competence –** Proficiency with application and/or system level development with Python & PHP is very desirable, but experience with any language is valuable
- **Experience with SQL –** Basic SQL queries
- **UNIX/Linux–** (some familiarity with the bash shell is a good start)
- **BS degree** in Computer Science, Engineering or a related subject
