

Mountain Skill Trip Coordinator Course – Tuesday, May 20 and Friday, May 23rd

Prior to our first outdoor session of the Trip Coordinators Course presented by Steve and Sandy, the eight unsuspecting participants were put through their paces in learning a variety of skills in the classroom. Subsequent to intros, Steve started the Tuesday session with a lecture on grid references, contour lines and how they work and generally how to pick and determine way points. Steve's lecture was followed by Sandy who taught all of the ins and outs about coordinating a hike. A ton of great info was shared. On Friday evening after supper, out route for the Saturday outdoor session was found as well as significant way points. This proved very useful on our Saturday adventure. By 11:15 everyone was quite ready to hit the sack!
